LIFE DESIGN STUDIO

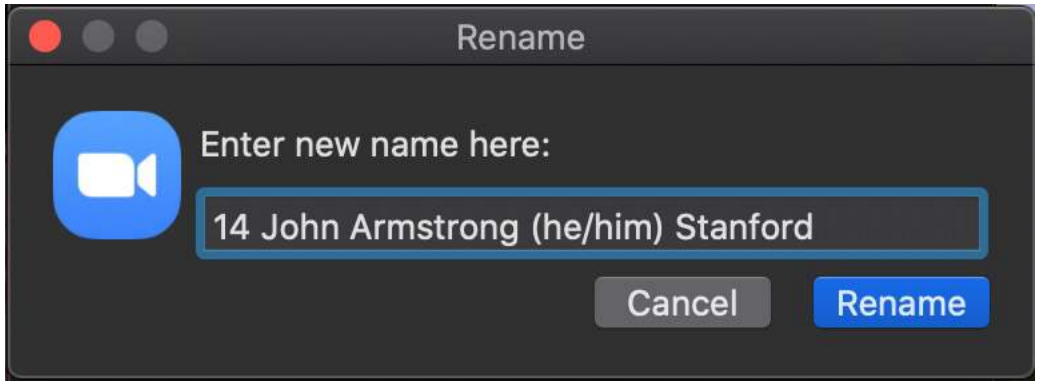

YOU ARE HERE!

WELCOME BACK!

- **PLEASE RENAME YOURSELF STARTING WITH YOUR MAGIC NUMBER**
  - Hover your cursor over the window with your face.
  - Click on the three dots next to your name.
  - Use the “Rename” function to display your preferred name and pronouns

- **EXAMPLE → → →**

- **Then, respond in the chat:**
  What idea or exercise from yesterday’s session did you find yourself thinking about?

Day 2 Agenda

- Welcome & Landing
- Worldview / Workview Integration
- Ideation Lecturette
- Odyssey Creation
- Break: 9:30-ish Pacific time
- Odyssey Sharing
- Decision Making
- Brainstorming & Prototyping
- Closing

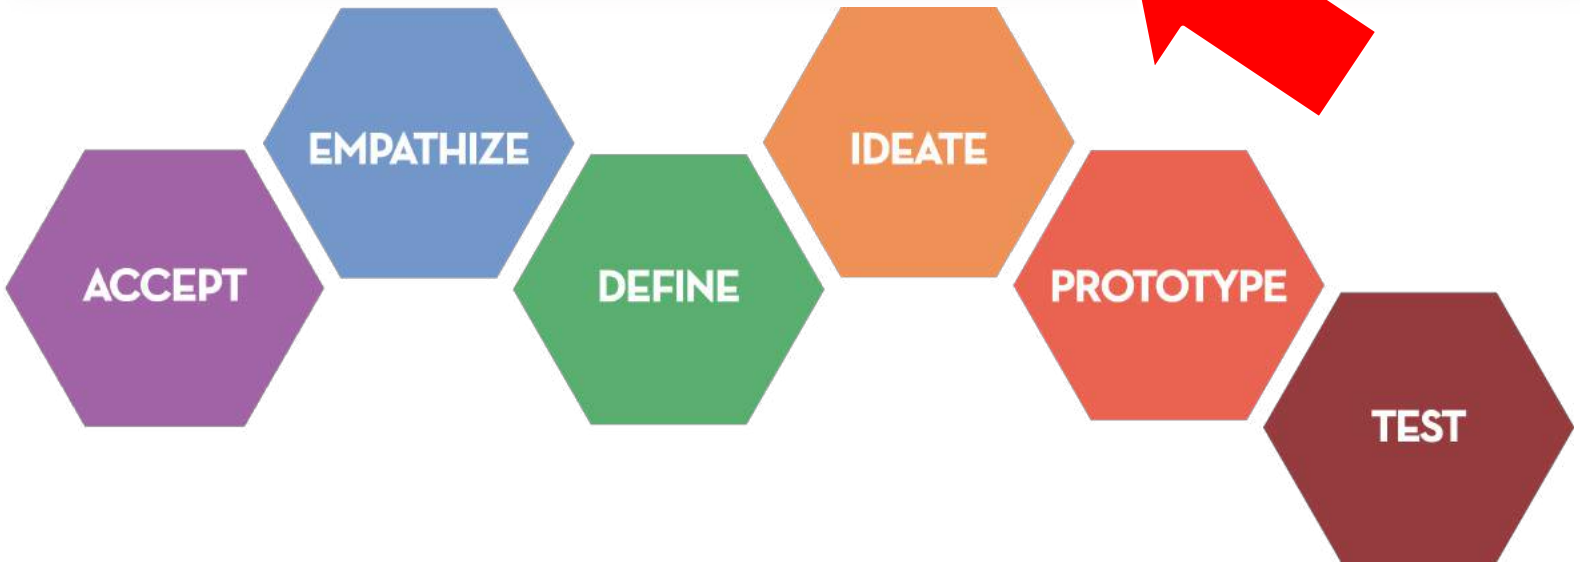

d.life
life design lab

WORKVIEW | WORLDVIEW INTEGRATION

COURSE FRAMEWORK

MEANING-MAKING

POV, Workview, Worldview

DISCOVERY & SUPPORT

Practices, Discernment, Mentors, Community

d.life
life design lab

COHERENCE

Connecting the dots increases coherence and meaning-making.

d.life
life design lab

WORLDVIEW & WORKVIEW

Personal exercise

LOOK OVER YOUR WORLDVIEW AND WORKVIEW.

- How do they integrate? Where do they complement or clash?
- Where might there be opportunity to improve coherence?
- How do your social identities inform them?
- How is what you're doing today coherent with your identities and views?

JOT DOWN A FEW OBSERVATIONS

d.life

life design lab

WORLDVIEW & WORKVIEW

Discussion

1. CHOOSE INTO YOUR MAGIC NUMBER BREAKOUT.

2. EACH PERSON:

- Read your Worldview – as written.
- Share a comment on your integration reflection.

3. AFTER ALL HAVE READ AND COMMENTED, DISCUSS:

- What did you hear that you appreciate?
- Any additional insights or ideas to offer?

d.life
life design lab

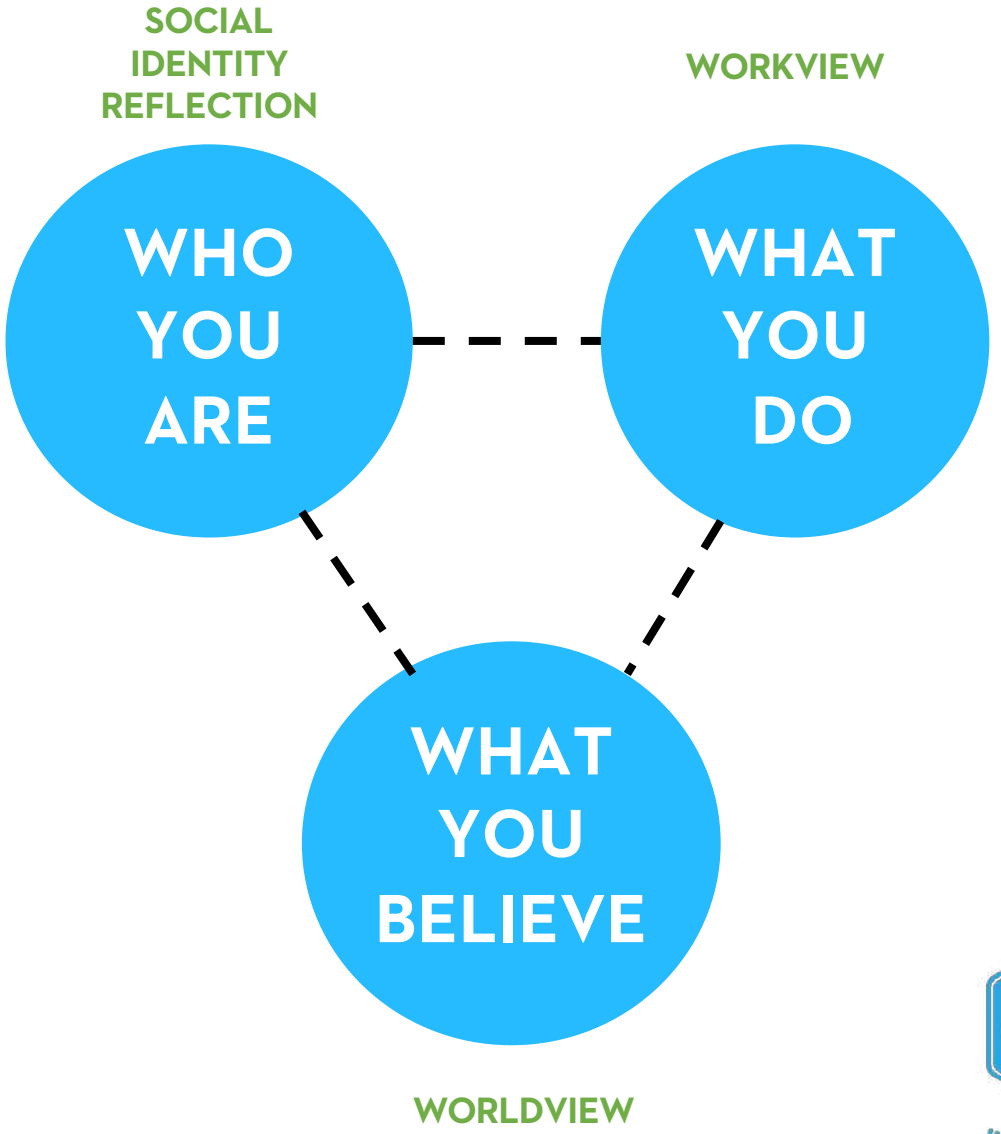

DEBRIEF

- How was it to write your Worldview? To share it?
- Was one view harder to write than the other? Why?
- What was the range of ideas in the Worldviews in your triad?
- What integration insights did you get?

d.life
life design lab

TAKEAWAYS

- Articulating what you believe increases ownership.
- Consciously reflecting on and designing coherence in your life is a continuous process as life changes.
- Connecting the dots increases coherence and meaning-making.

WHY WILD IDEAS?

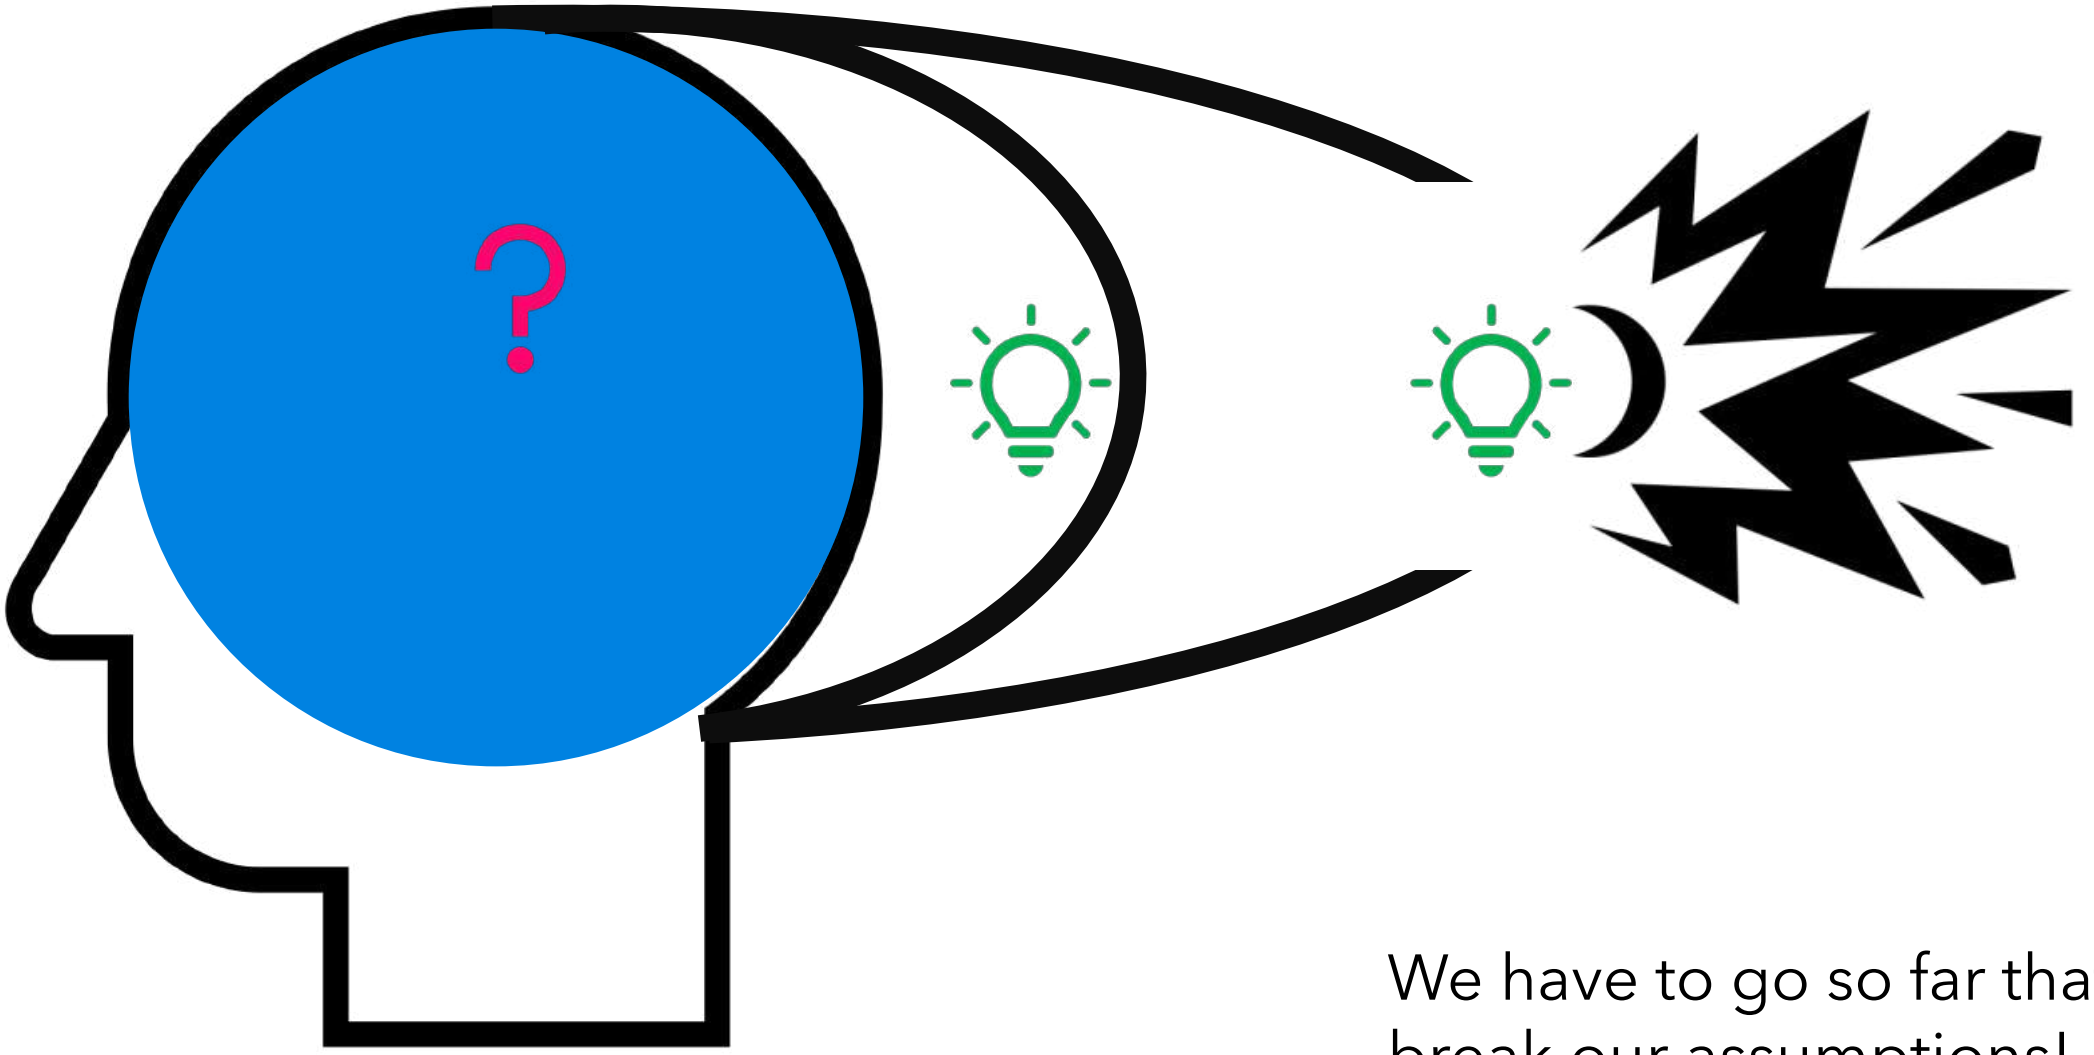

WHY WILD IDEAS?

BUT OUR ASSUMPTIONS ARE TOO STRONG!

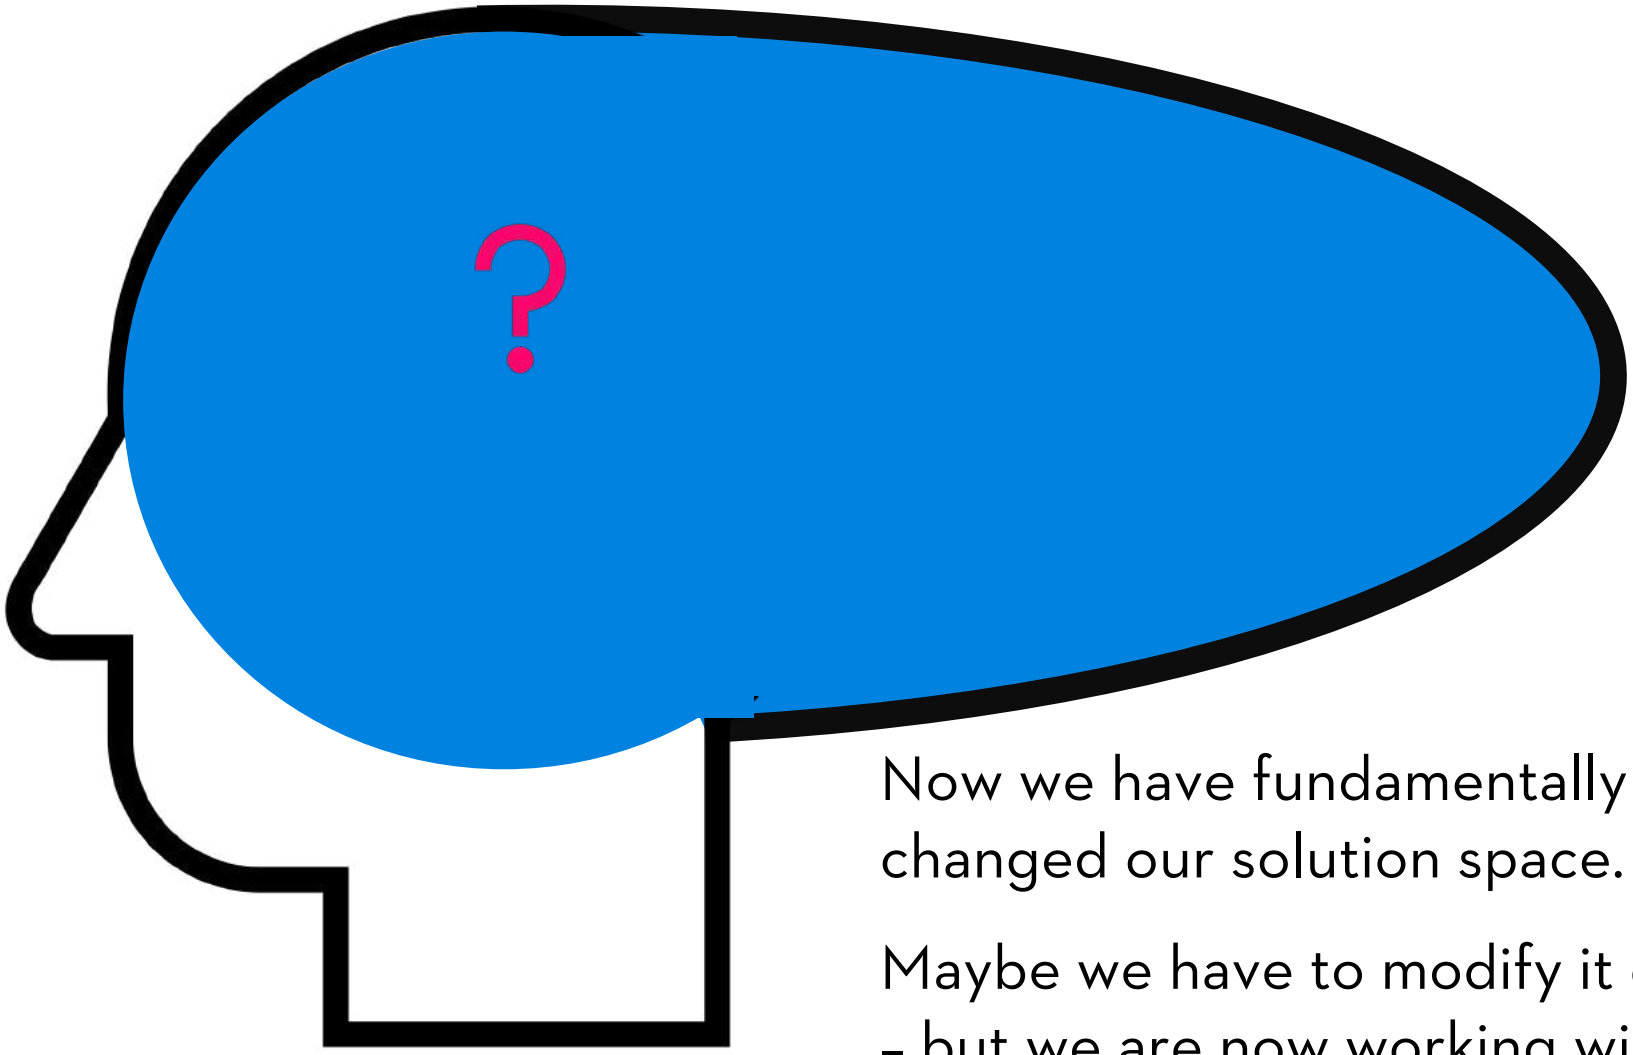

And it ends up back “inside the box.”

WHY WILD IDEAS?

We have to go so far that we break our assumptions!

WHY WILD IDEAS?

Now we have fundamentally changed our solution space.

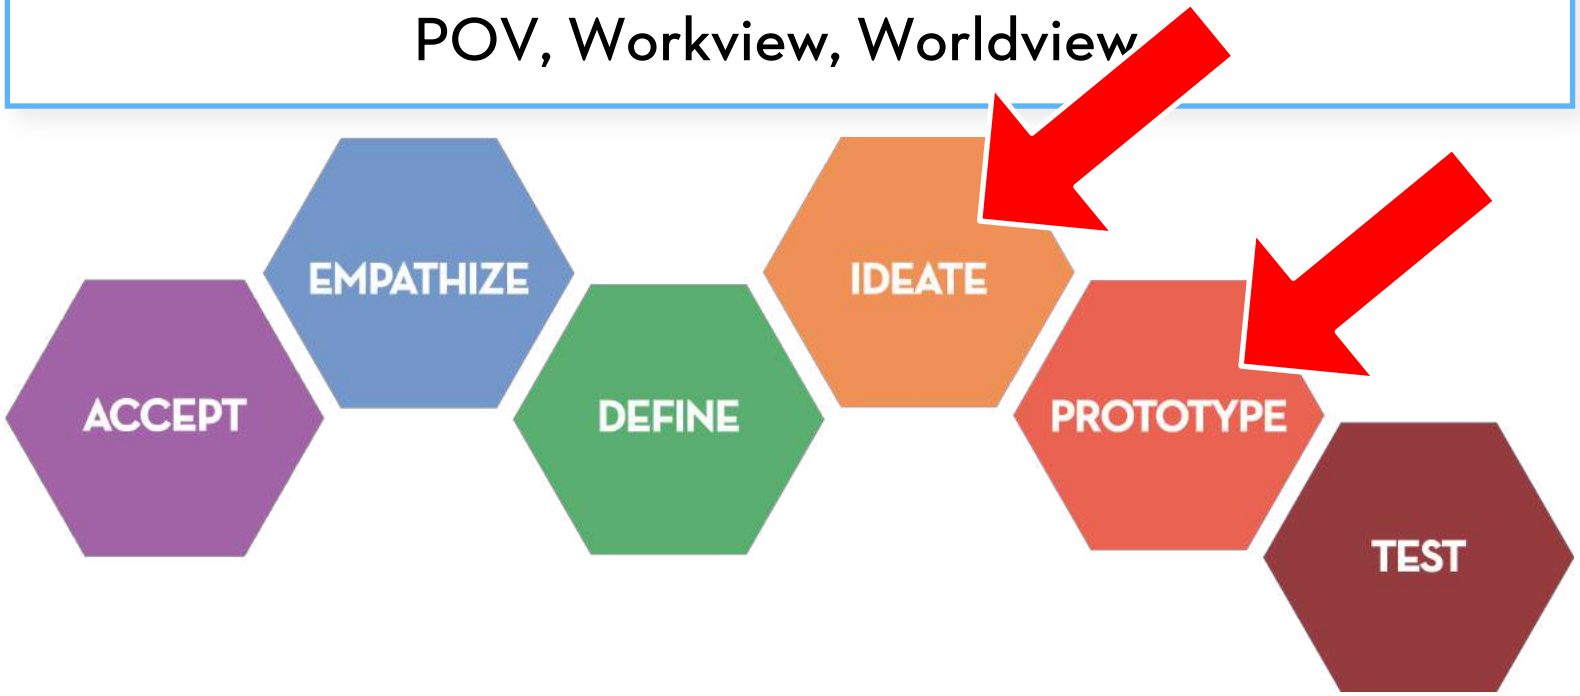

Maybe we have to modify it during implementation – but we are now working with new insights!

SHARING ODYSSEYS

RETURN TO MAGIC NUMBER BREAKOUTS

5 min presentation

5 min response

SPEAKERS

Share the story of each life.

LISTENERS

1. What particular affirmations or encouragements do you have to offer?
2. What themes do you notice?
3. What do you notice that prompts you to ask, "tell us more"?

    - inquire, but don't take the talking stick

    - keep the energy center with the presenter

d.life

life design lab

HOW WAS THAT?

- What was it like to make 3 different versions of your future?
- What was it like to share your Odysseys with your partners?
- What was it like to hear others' Odysseys?

FOURTH ODYSSEY

For the next few minutes, create a FOURTH ideation of the next 5 years.

Make this totally unlike your other Odysseys. Try to:

- Release all constraints - especially self-imposed
- Represent secret hopes and wishes
- Allow for the impossible, the totally unrealistic, even a little scary

You will not be asked to share. Have fun with it!

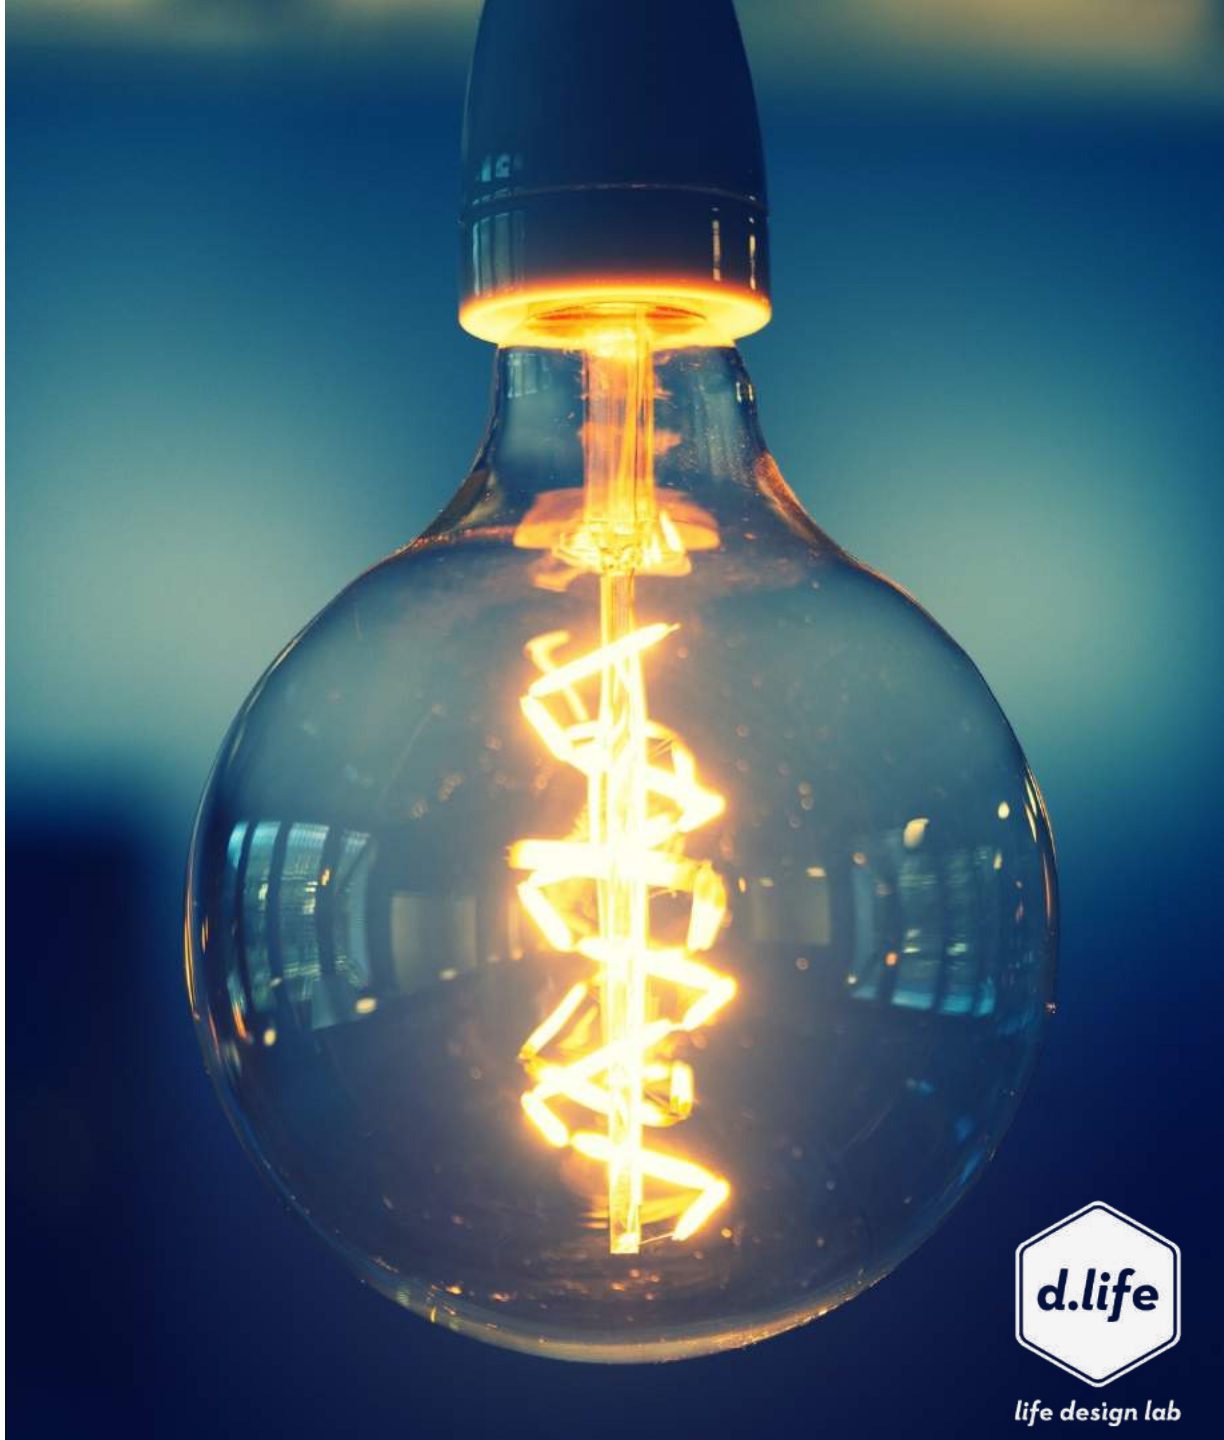

d.life
life design lab

TAKEAWAYS

Odysseys are mini-prototypes of future possibilities; test them and iterate to learn.

Three alternatives is always better than one!

Radical collaboration and non-judgmental listening can be hugely helpful in life design.

d.life
life design lab

DECISION MAKING

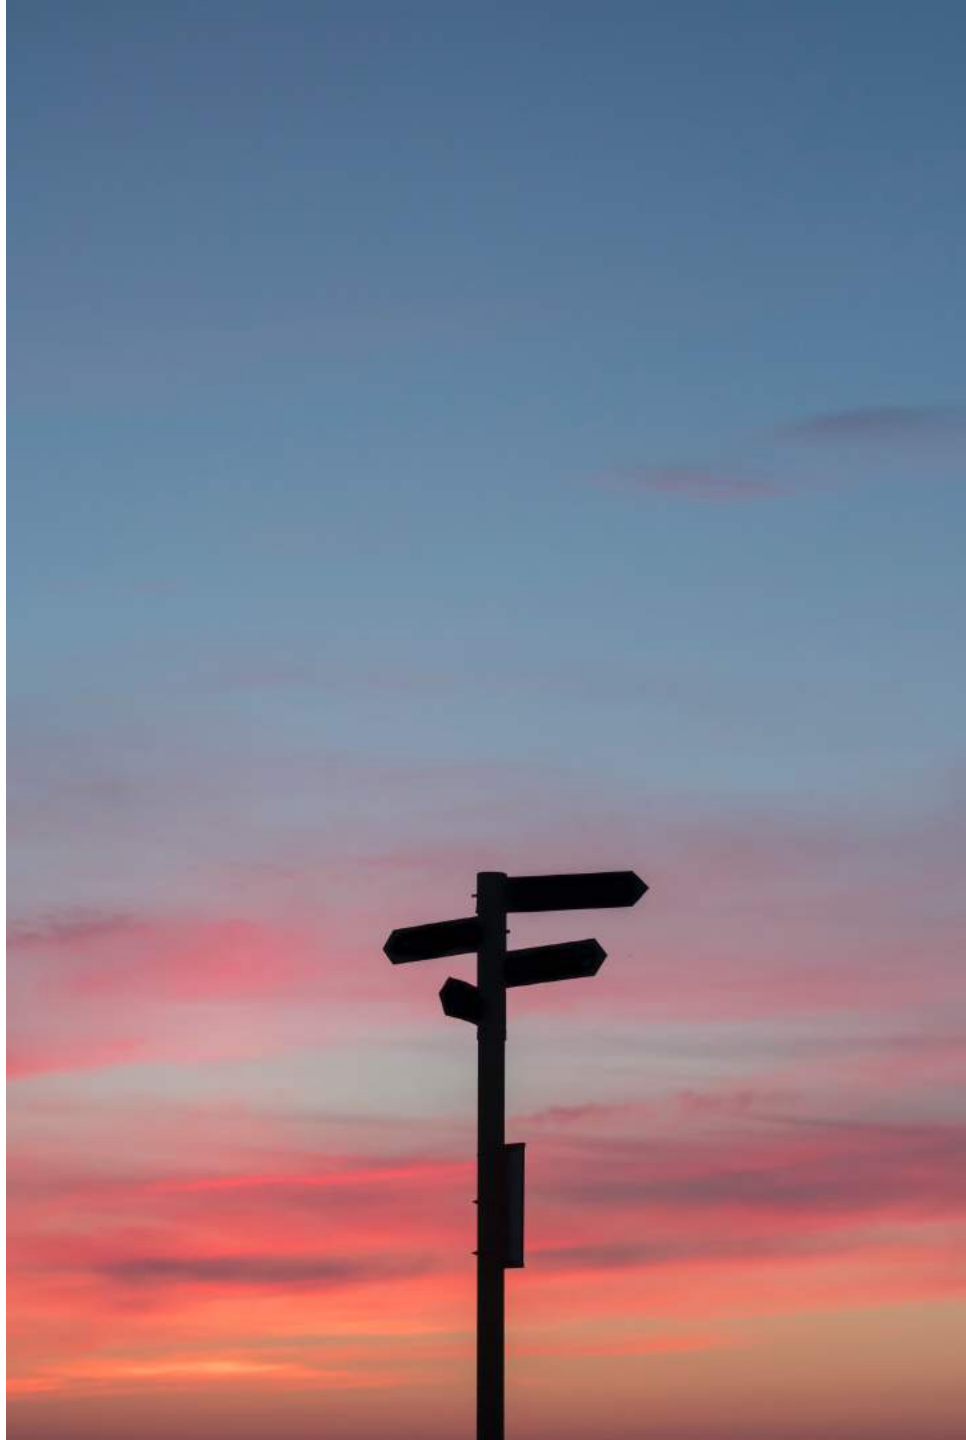

MAKING DECISIONS: A Process for Choosing

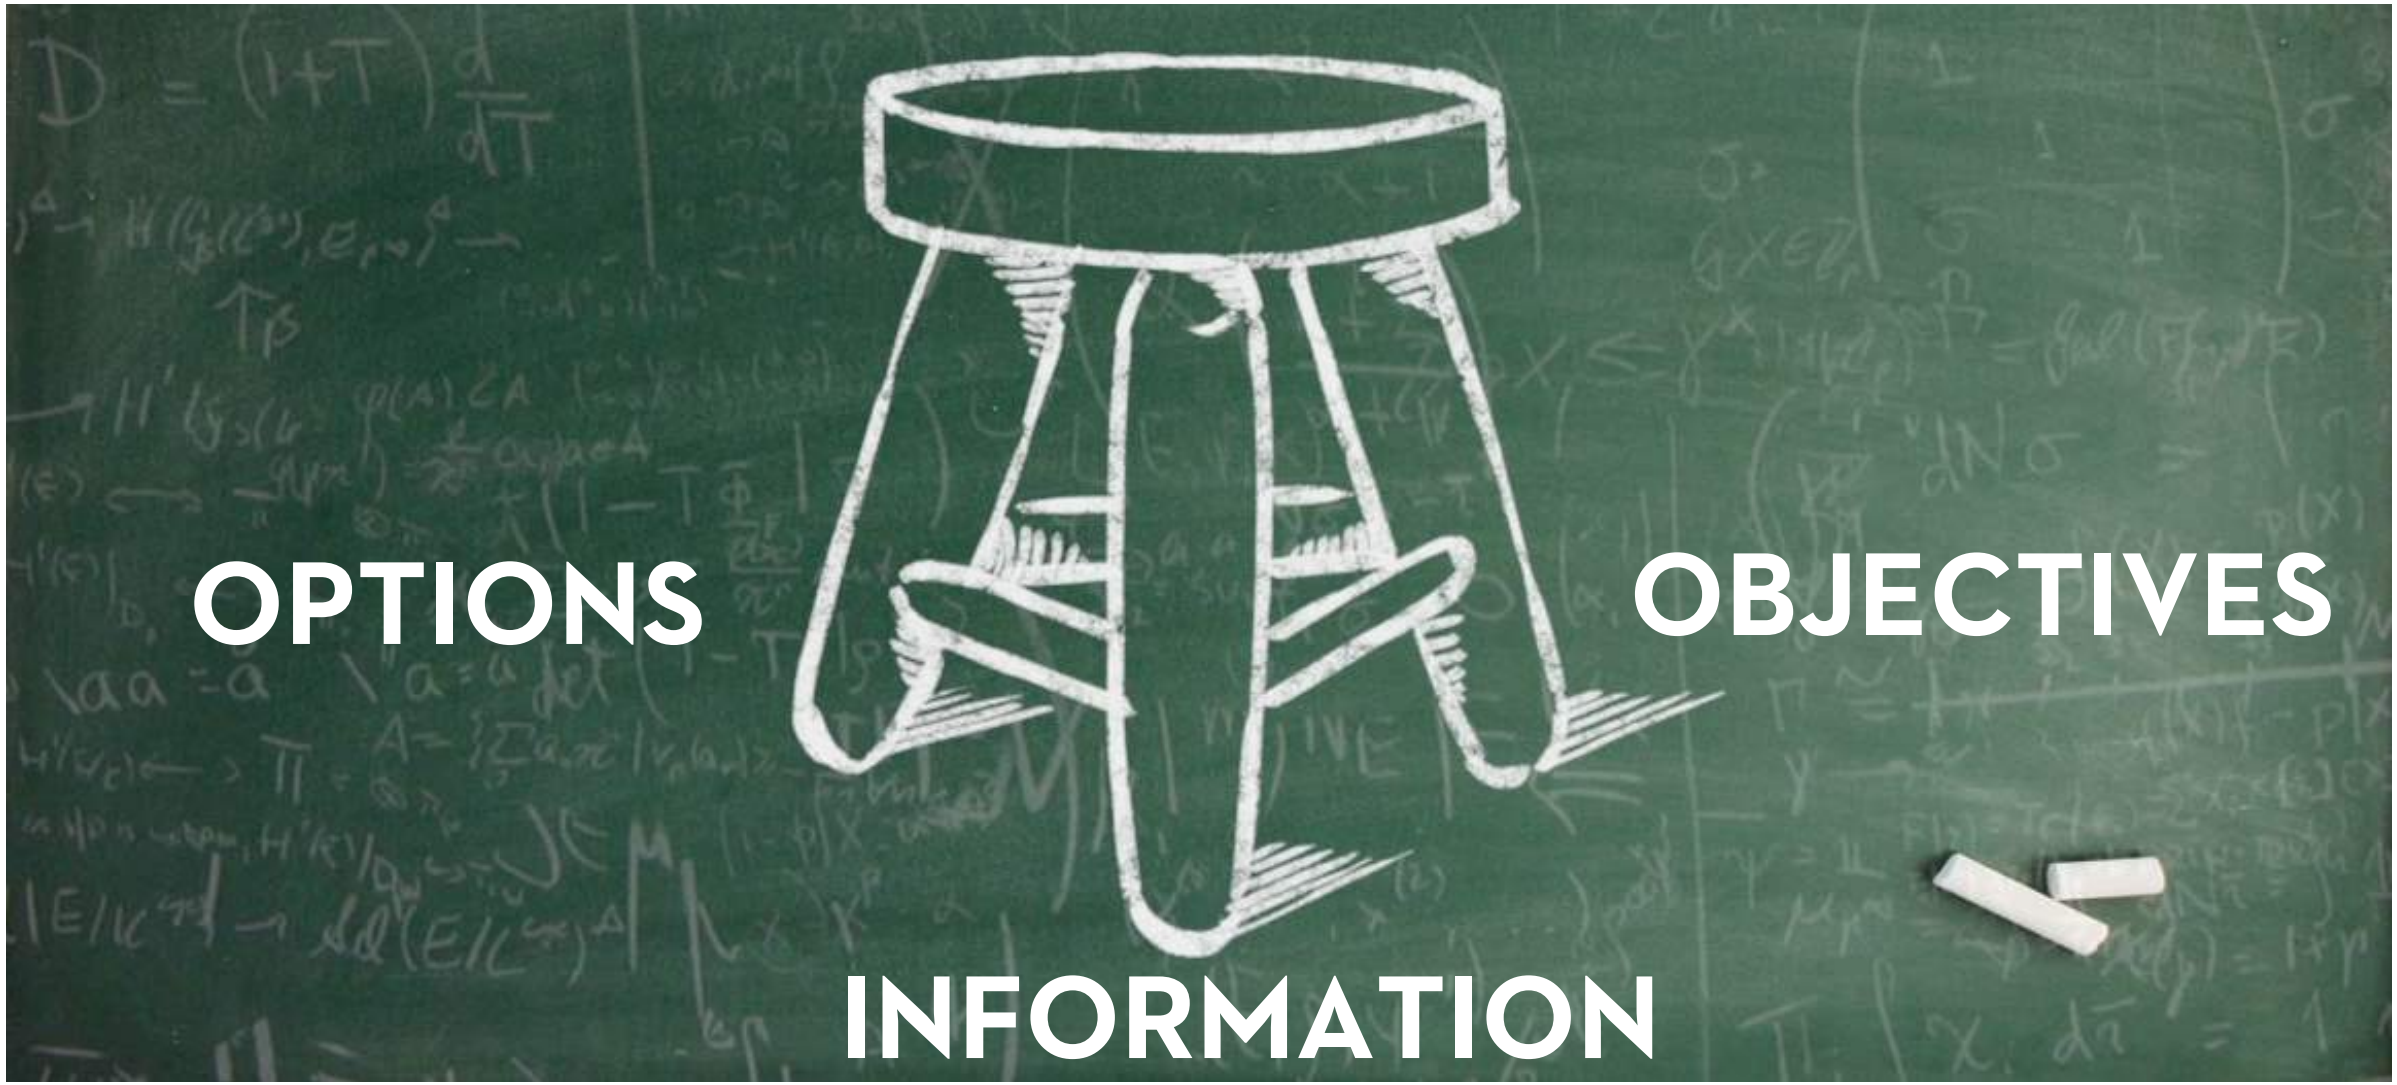

JOT DOWN:

- A real decision you need to make, an important choice or one where you feel stuck or indecisive.
- The emotions and physical sensations that come up when you bring this decision to mind (ex. happiness, anger, fear; tingling, tightness, “butterflies,” etc.).

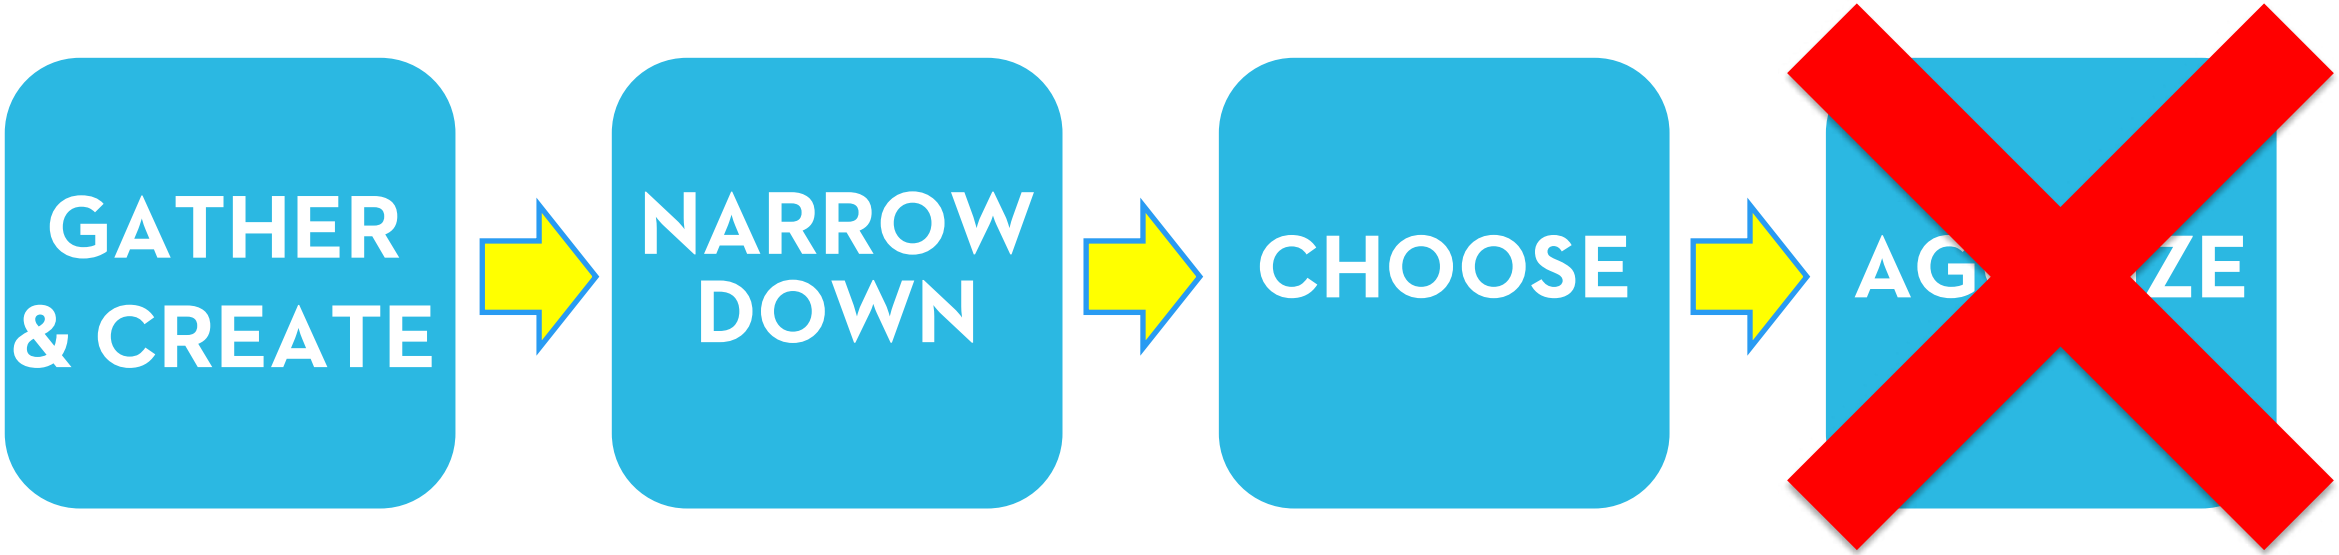

Note: You may be sharing this decision with others in a moment.

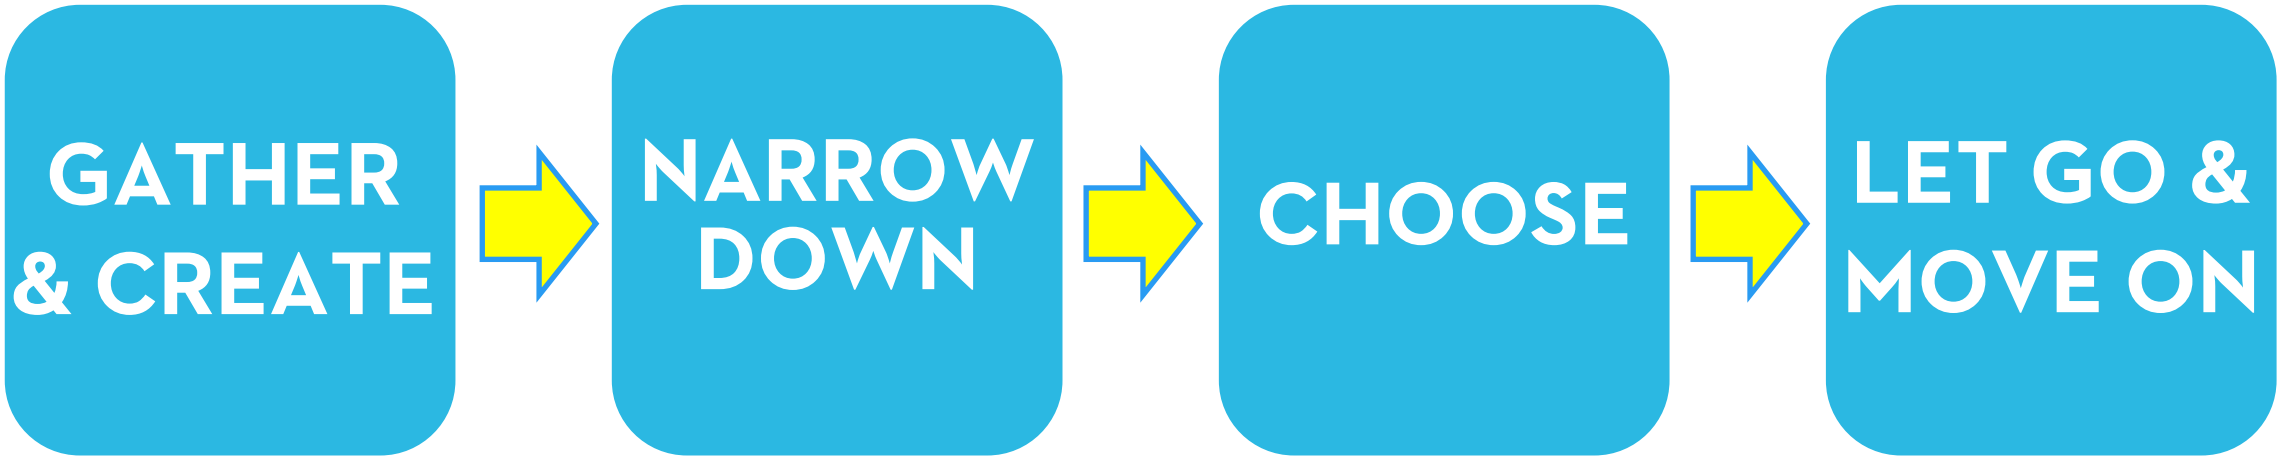

ELEMENTS OF A DECISION

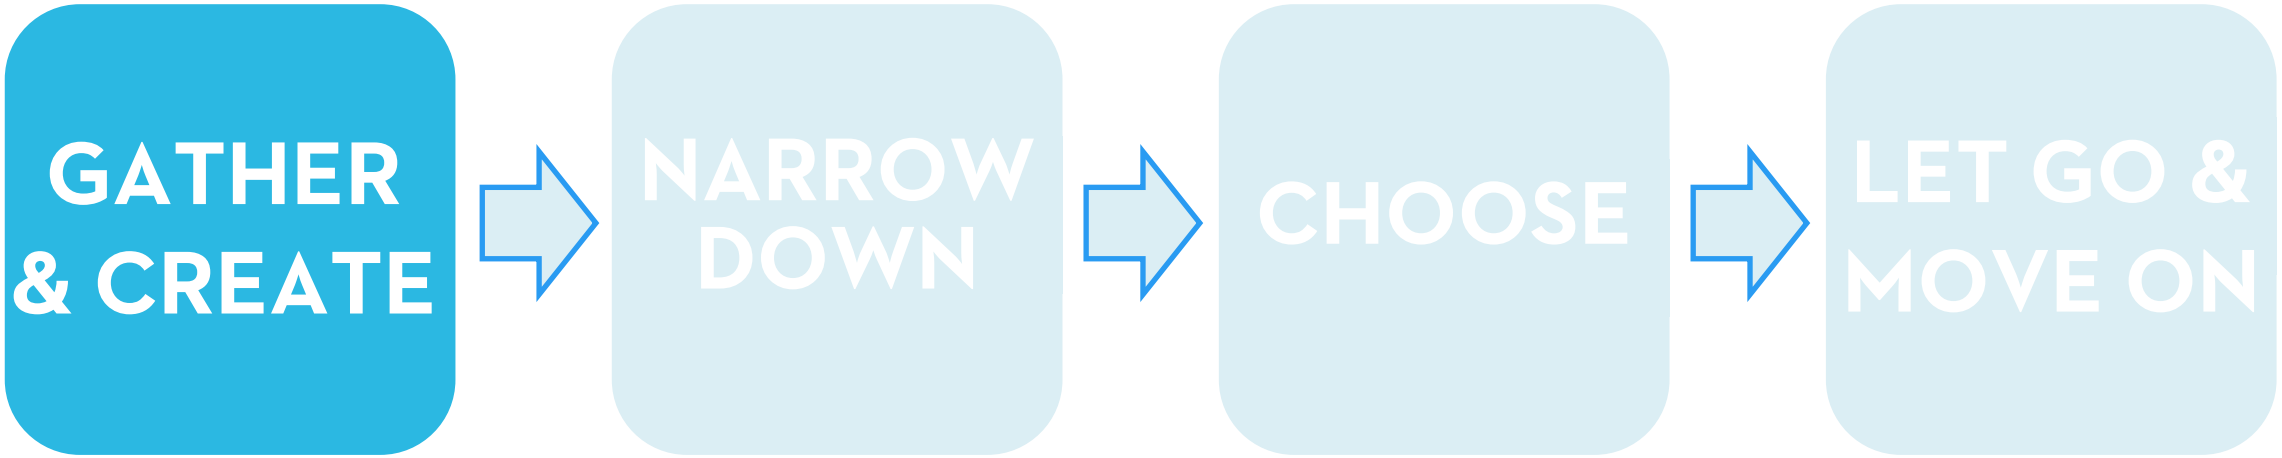

DECISION-MAKING PROCESS

DECISION-MAKING PROCESS

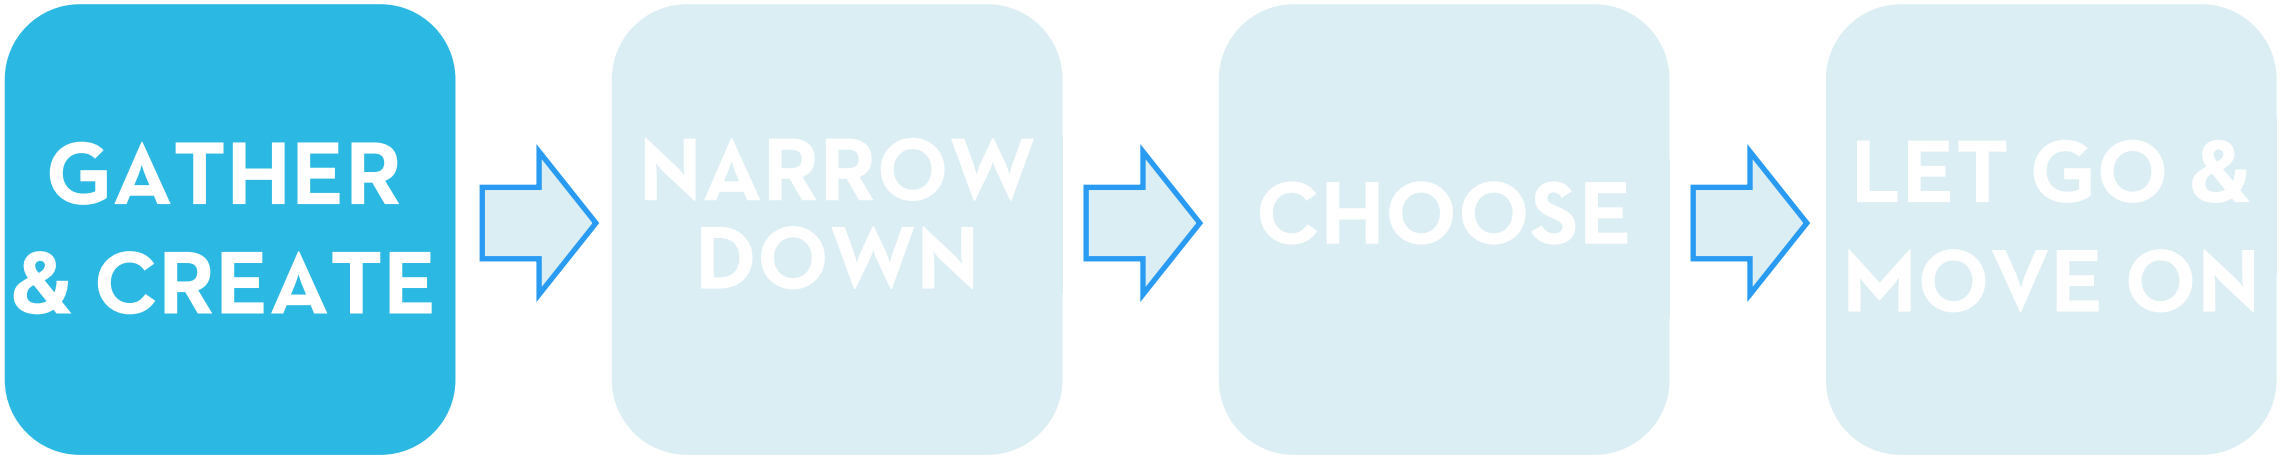

DECISION-MAKING PROCESS

EXPANDING BEYOND BINARY OPTIONS

Research (Chip + Dan Heath) suggests that expanding our options beyond two will improve our experience with the outcomes.

DECISION-MAKING PROCESS

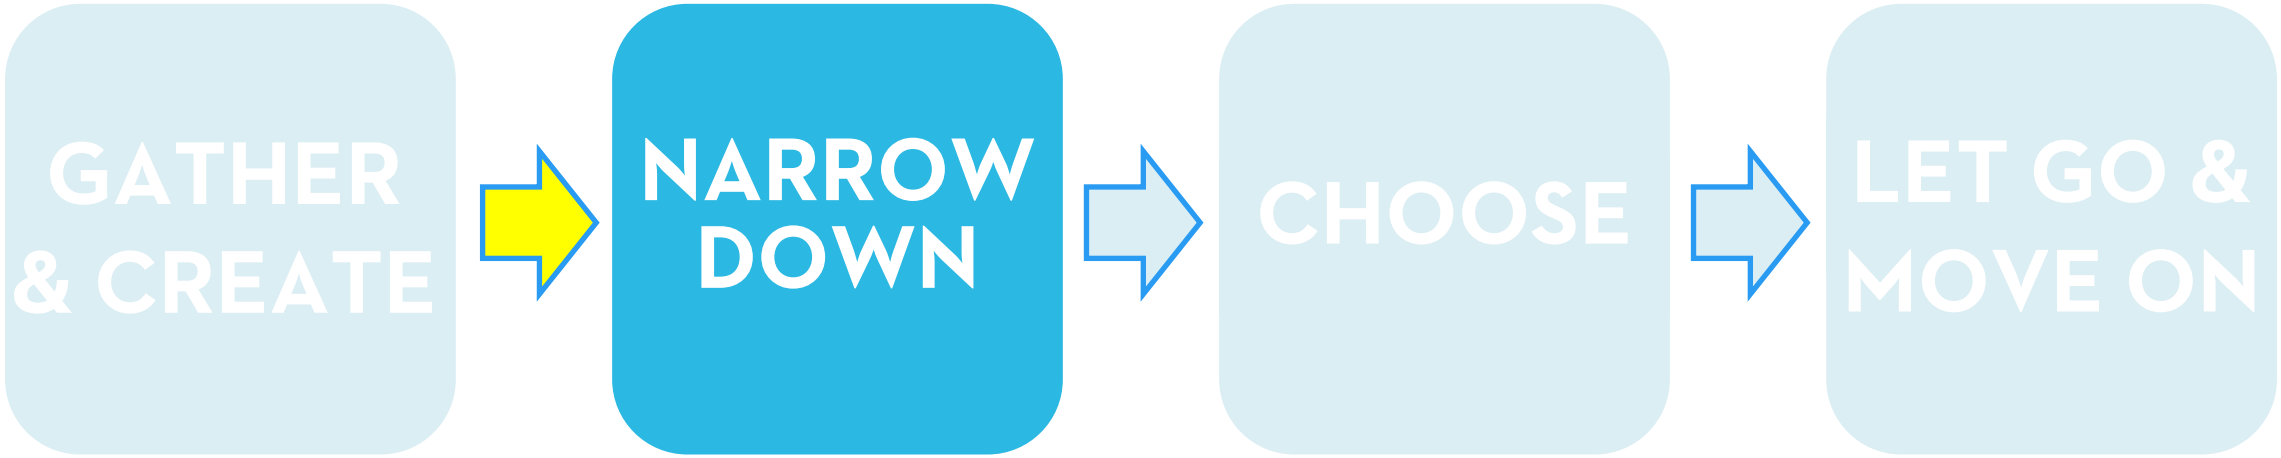

LUCK IS ABOUT BEING OPEN + CURIOUS.

Research (Richard Wiseman) suggests that those who call themselves "lucky" tend to look beyond the task given, to question to premise, and to actively seek out new ways of doing things.

Anxiety can disrupt people's ability to notice the unexpected.

DECISION-MAKING PROCESS

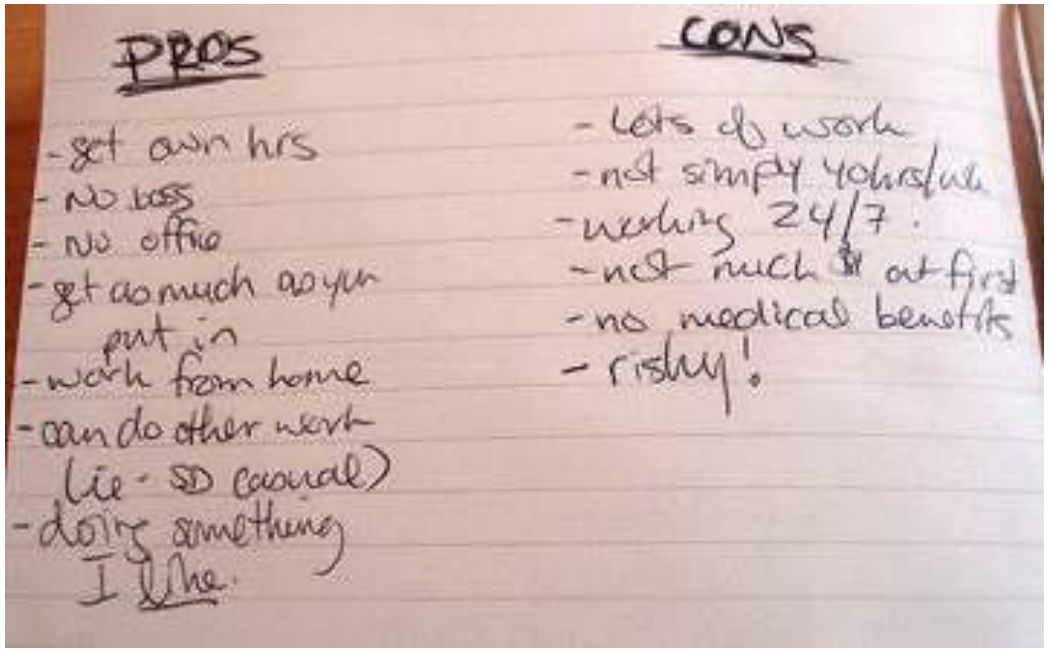

TOO MANY OPTIONS CAN RESULT IN CHOICE OVERLOAD.

Research (Sheena Iyengar) suggests that we do not do well with too many options – especially in decisions of consequence.

”We choose not to choose even when it goes against our best self-interest.”

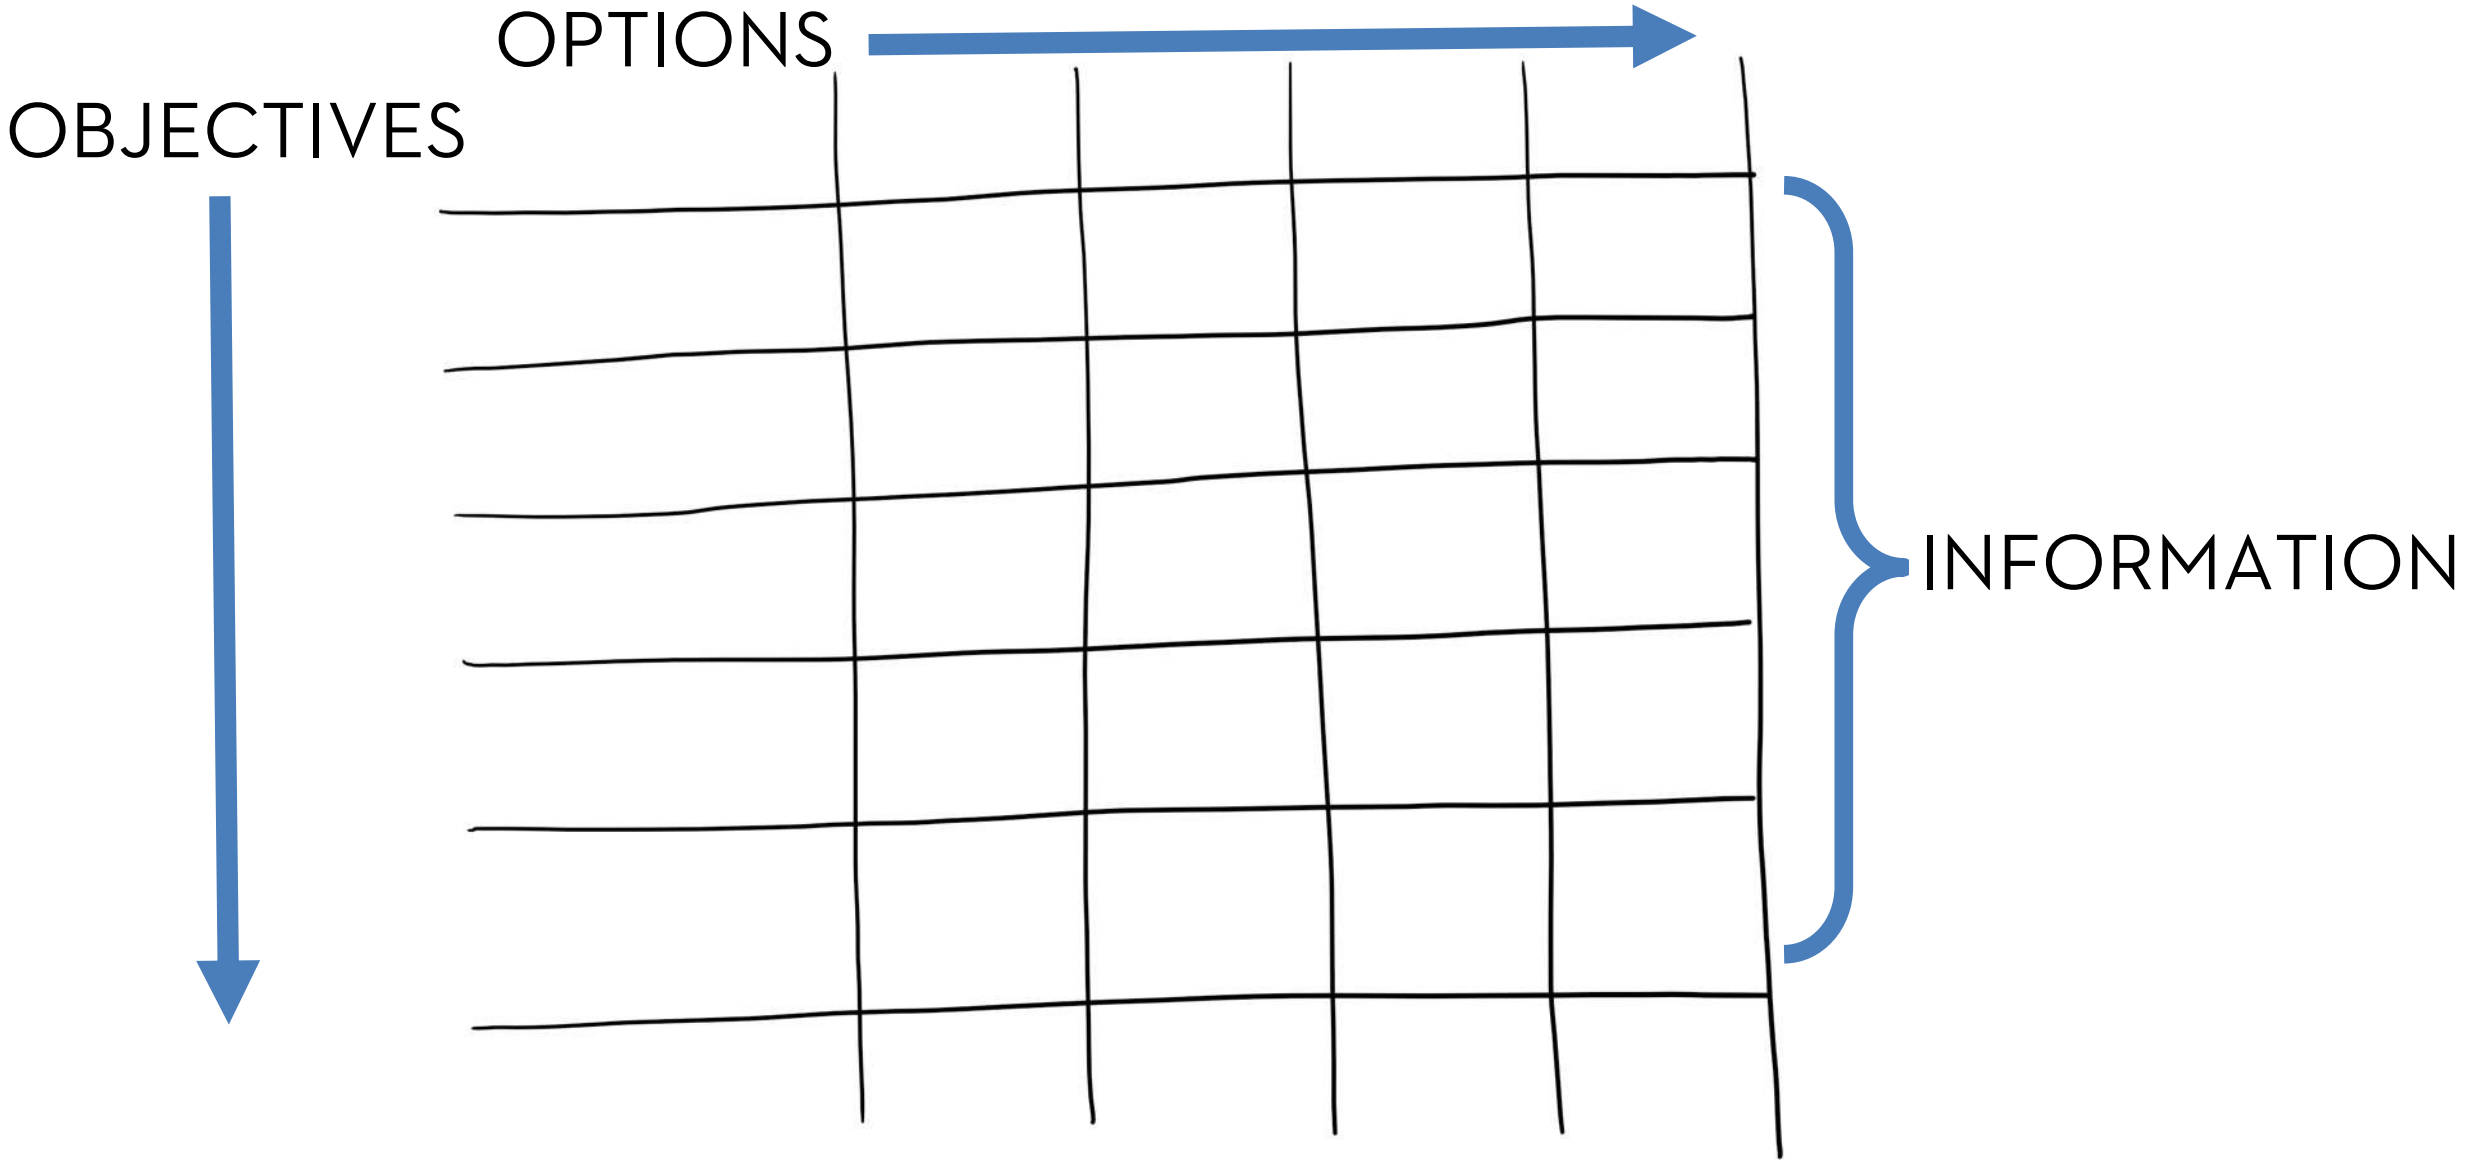

INFORMATION: SIMPLIFYING A DECISION

ORGANIZING YOUR THOUGHTS

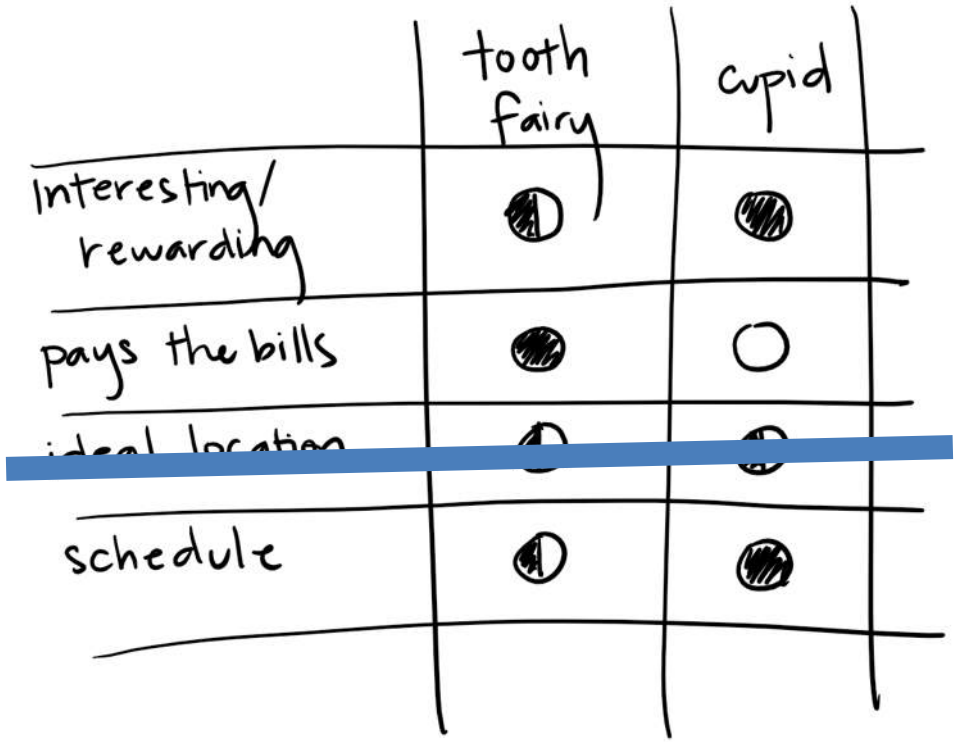

FILLING OUT A DECISION MATRIX

OPTIONS →

OBJECTIVES ↓

				
minimum additional skill building				
interesting / rewarding				
pays the bills				
ideal location				
schedule				

SIMPLIFY THE DECISION

SOME TIPS BEFORE YOU DO THIS

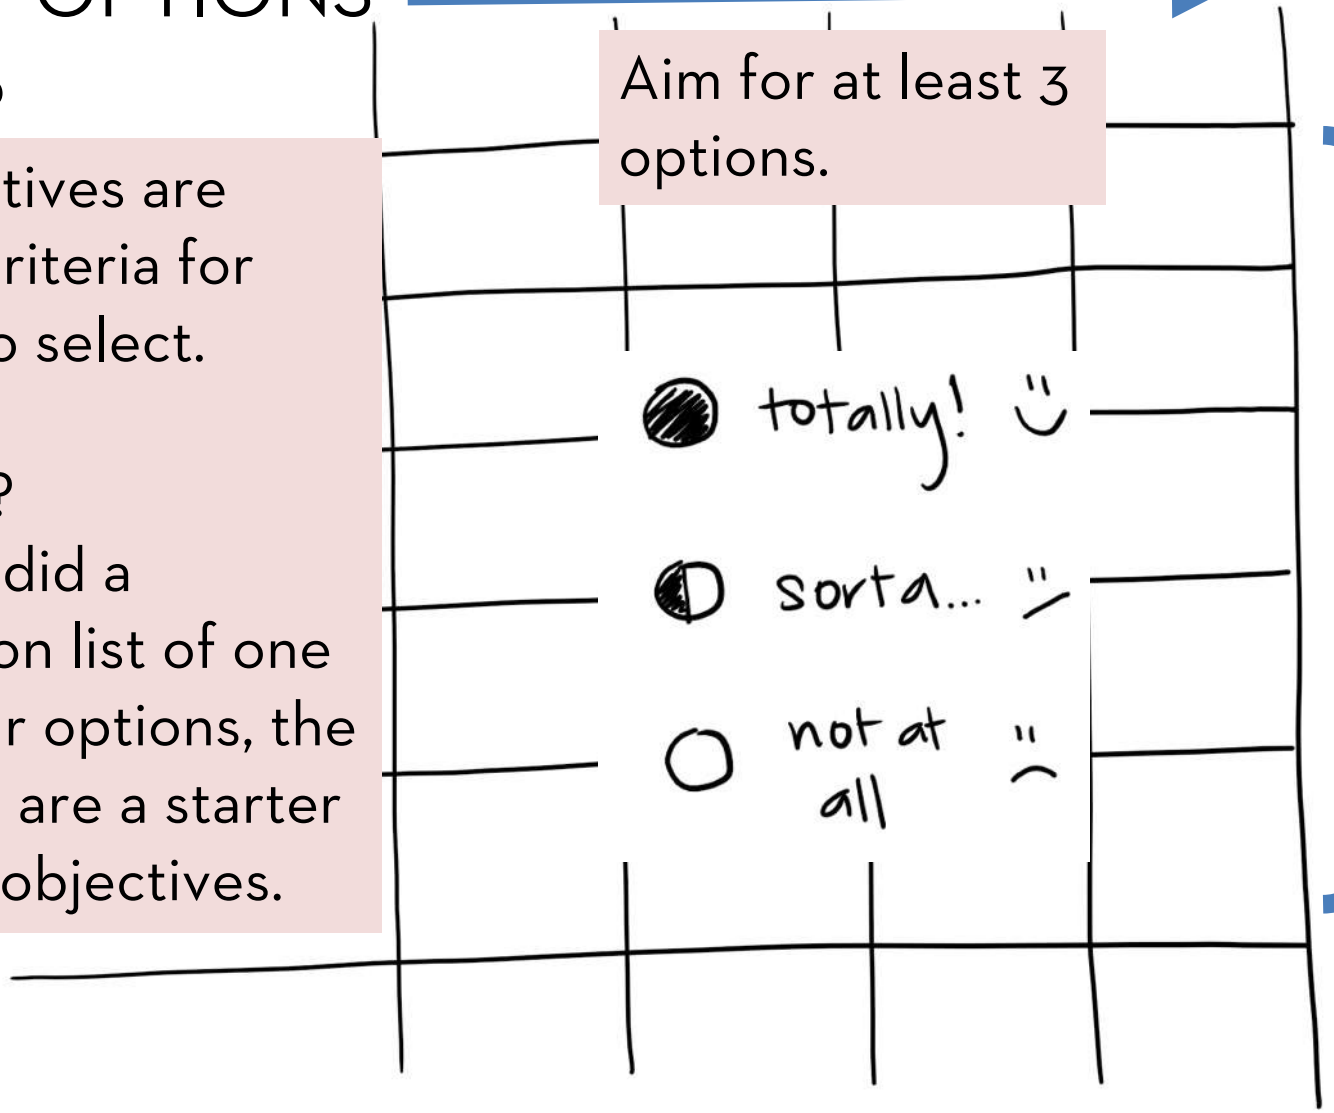

OPTIONS

OBJECTIVES

Aim for at least 3 options.

Objectives are your criteria for how to select.

Stuck?
If you did a pro/con list of one of your options, the "pros" are a starter list of objectives.

INFORMATION

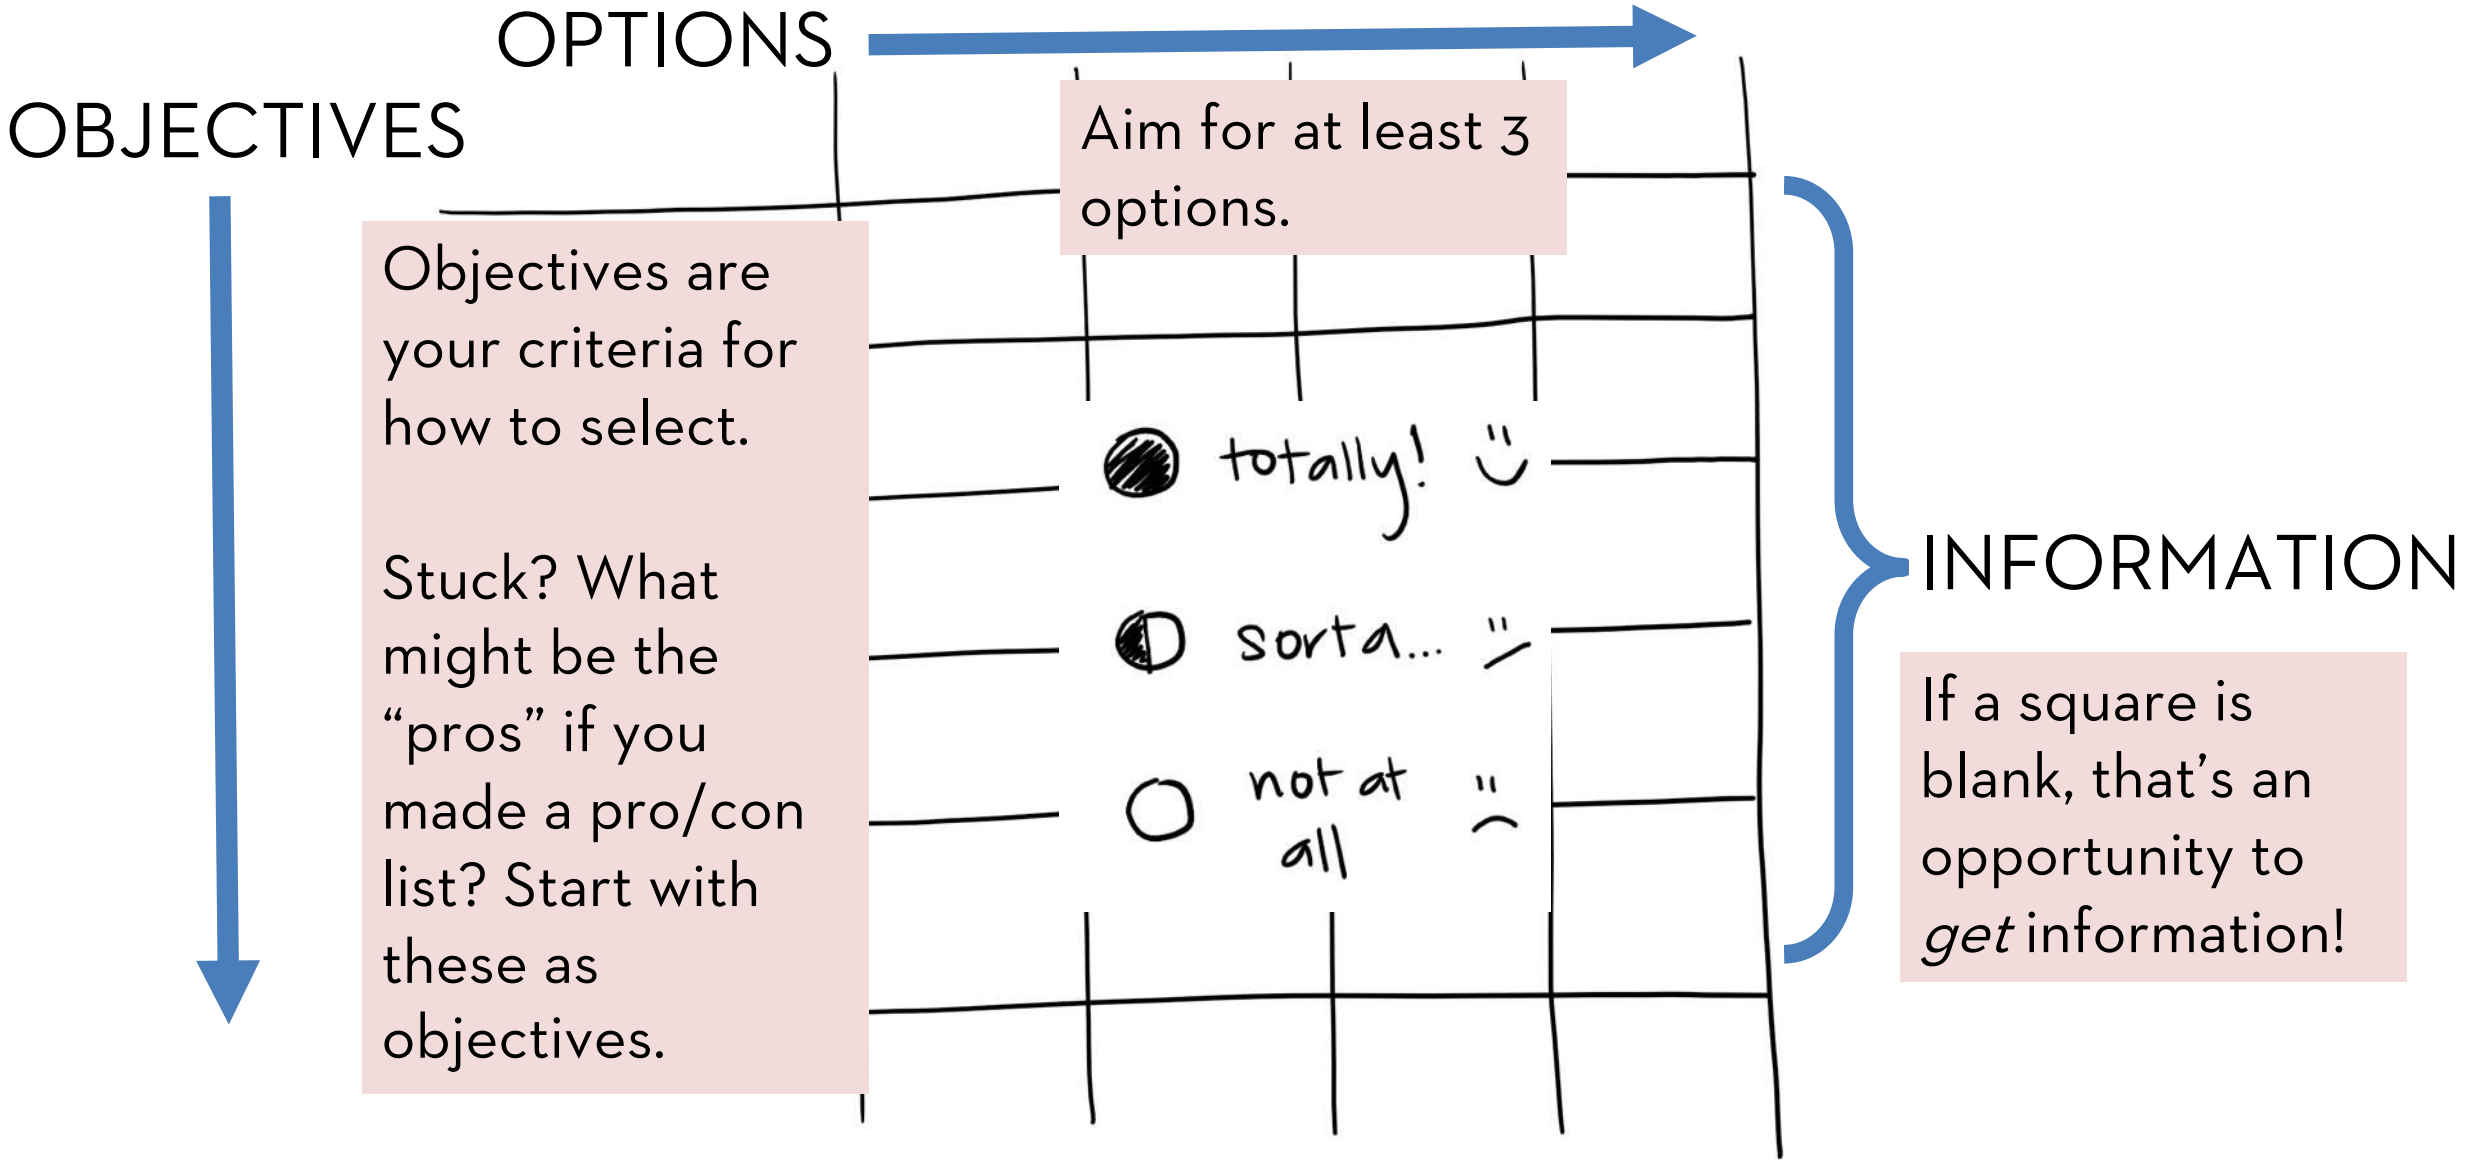

If a square is blank, that's an opportunity to *get* information!

CAUTION: THE "OR NOT" BINARY

- "Should I do this or not?" is a clue that you may be trapped in a binary decision.
  - *Ex. Accept the job offer I got, or not?*

- Change the "not" into options you might do, based on your criteria.
  - *Ex. Accept the offer as it stands or…*
    - *Negotiate the terms of the offer; or,*
    - *Say no and conduct more info interviews; or …*
    - *Defer start date by 3 months to pursue lifelong dream of climbing Mt. Everest; or …*

YOUR TURN: SIMPLIFY YOUR DECISION

DISCERNMENT

Integrating multiple ways of knowing

- **Cognitive Intelligence**
  - Pro-Con List
  - Reasons
  - Decision Matrices
- **Emotional Intelligence**
  - Feelings
  - Intuition
  - Spiritual
- **Physical Intelligence**
  - Physical Messages
  - (e.g. headache, stomach ache, feeling light, etc.)
- **Social / Collective Intelligence**
  - Wisdom of mentors, trusted community, ancestors
  - Collective knowing (shared insight)

DECISION-MAKING PROCESS

EMOTIONAL INTELLIGENCE

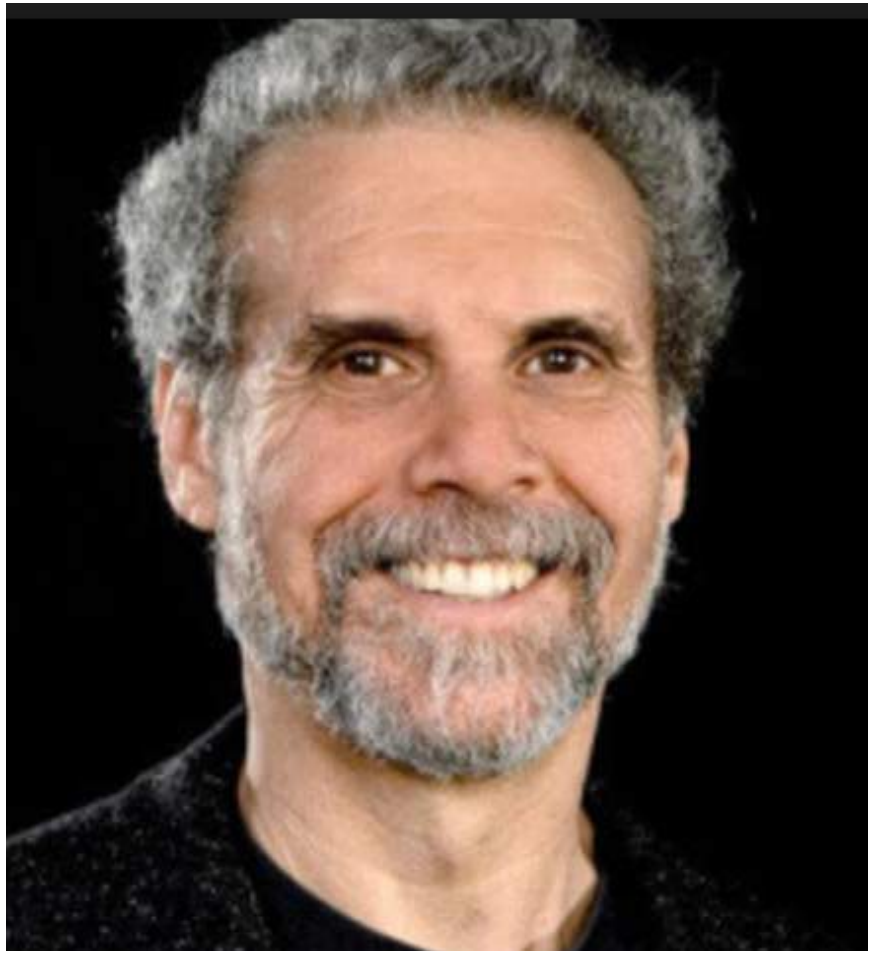

Research (Daniel Goleman) suggests that our brain sends emotional responses to our gut (not to our brain), thereby creating “gut feelings.”

CHOOSING

CHOOSING: WISDOM OF THE EMOTIONS

Daniel Goleman NEW VIDEO

Author of Emotional Intelligence, psychologist, and science journalist

CHOOSING: WHEN CHOICES ARE ON A PAR

Ruth Chang, Philosopher at Oxford

CHOOSING: WHEN CHOICES ARE ON A PAR

"The lesson of hard choices --- reflect on what you can put your agency behind, on what you can be for --- and through hard choices, become that person."

- Ruth Chang, Philosopher at Oxford

CHOOSE

DECISION-MAKING PROCESS

Keep your options open?

Turns out – it doesn't always work.

"Wanting what you get," not
"Getting what you want."
- Dan Gilbert, Harvard Psychologist

**LET GO &
MOVE ON**

CYCLE OF NON-REGRET

Dr. Afia Ofori-Mensa

1. Make the best decision you can with the information you have at the time.
2. Resist the temptation to judge past-you with the information that present-you received after that decision was made.
3. Recognize that you are who you are, you can onl be you, because everything in your life has happened in precisely the way and exactly the order in which it has happened.
4. Love yourself.
5. **Trust that future-you can handle the results of whatever decisions present-you makes.**

MICHELLE FLORENDO

Didn't get to all of your questions?

Check out Michelle Florendo!

- Stanford decision engineer and co-creator of this module.
- Creator of the "Ask a Decision Engineer" podcast.

PROTOTYPING

BRINGING IDEAS...

TO LIFE

d.life

life design lab

WHY PROTOTYPE?

PROTOTYPE TO:

- Reduce risk
- Expose assumptions
- Engage others with your ideas
- LEARN and sneak up on your future!

PROTOTYPE DESIGN

A GOOD PROTOTYPE is:

- Cheap
- Quick
- Accessible

d.life
life design lab

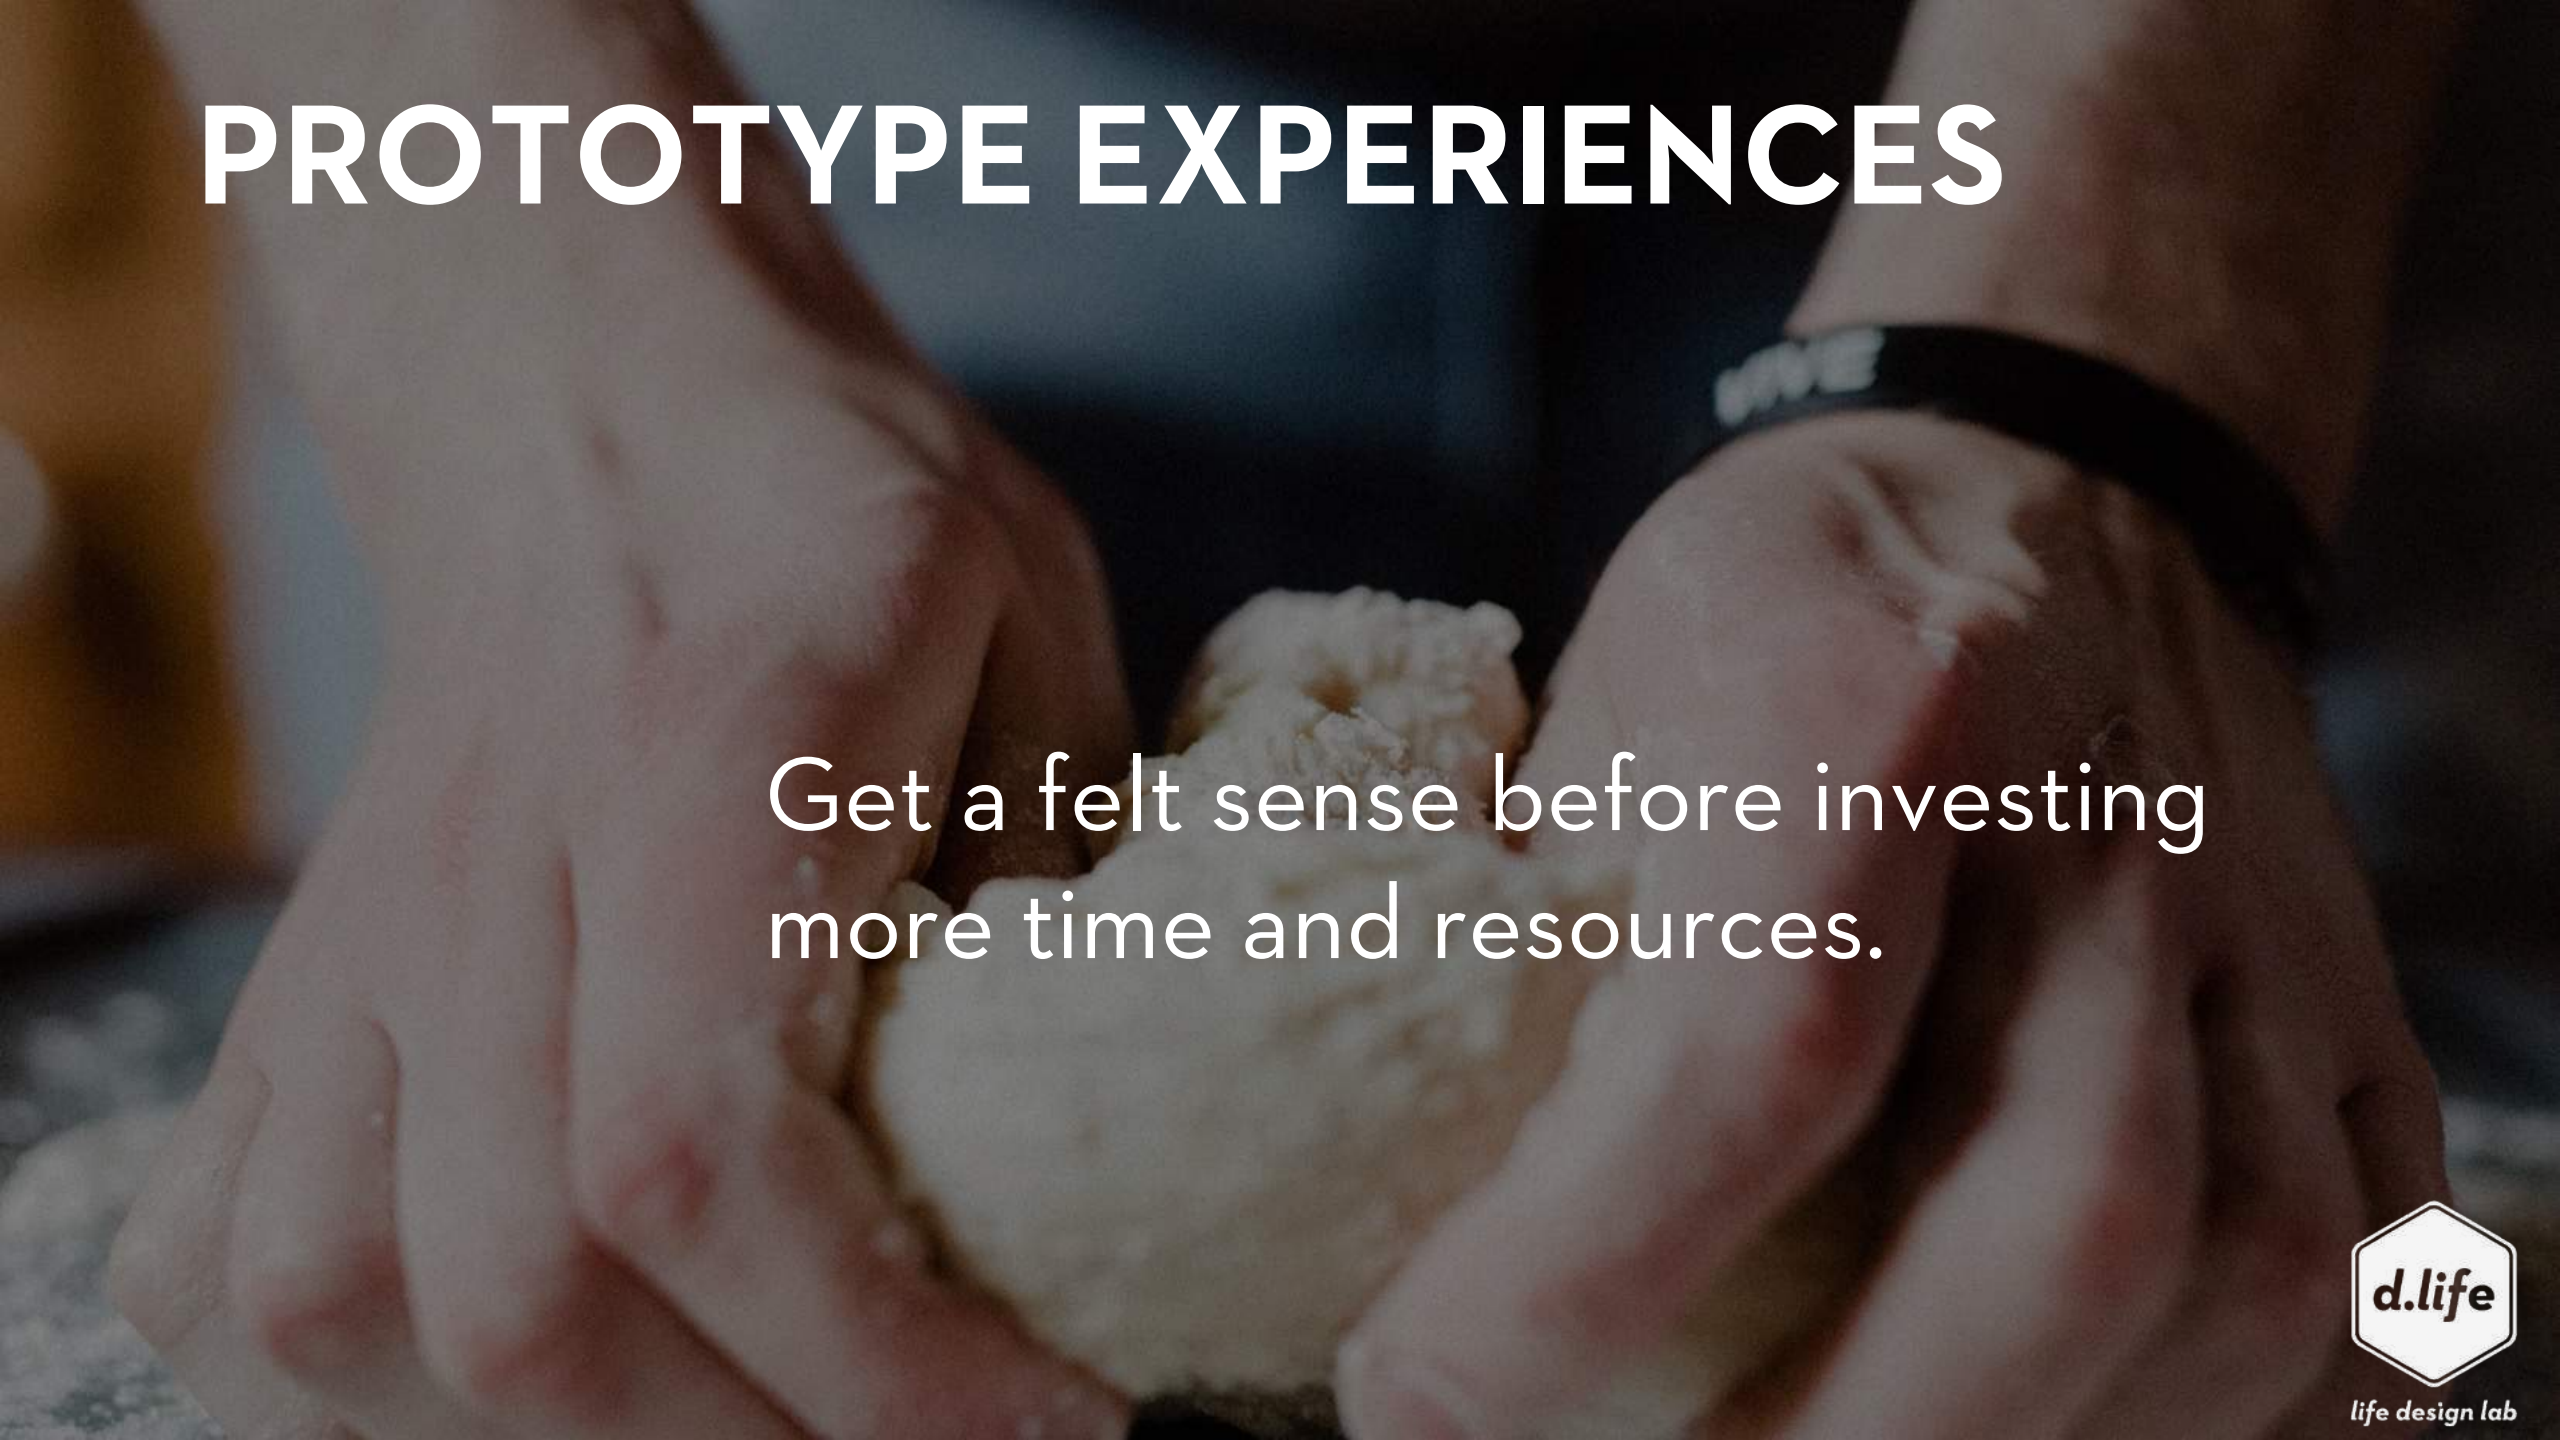

PROTOTYPE CONVERSATIONS

Talk to someone living the future you are curious about to get *their story.* Everyone has a story that can change your life.

d.life
life design lab

PROTOTYPE EXPERIENCES

Get a felt sense before investing more time and resources.

d.life

CURIOSITY

COLLABORATION

BIAS TOWARD ACTION

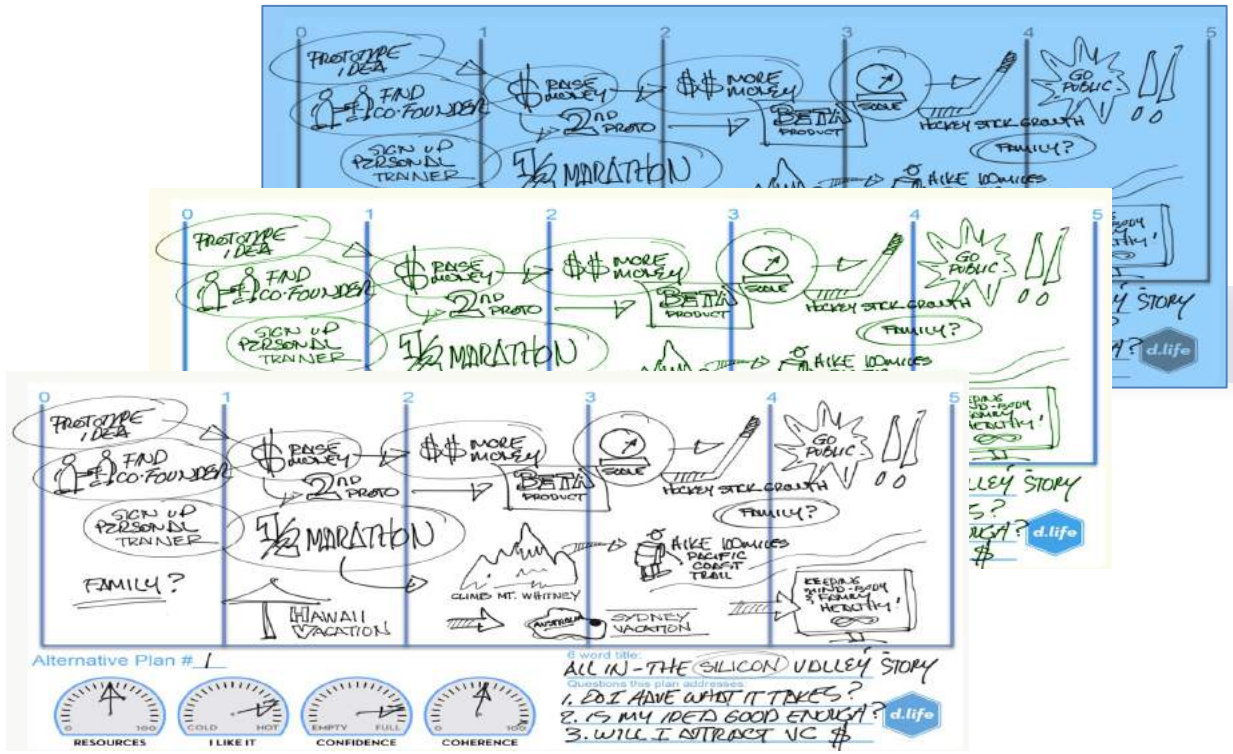

d.life

life design lab

GETTING INTO ACTION

Our Goal:

Get ideas from each other about **prototype conversations** or **experiences** to help us make a part of an Odyssey a reality.

d.life
life design lab

5 STEPS OF BRAINSTORMING

1. FRAME a good problem

2. WARM UP to access the synthesizing brain

3. Use specific rules to BRAINSTORM lots and lots of ideas

4. SELECT ideas based on a specific criterion

5. EXTRACT INSIGHTS for follow-up

BRAINSTORMING

1. **FRAME** a good problem

FIRST: ENGAGE YOUR CURIOSITY

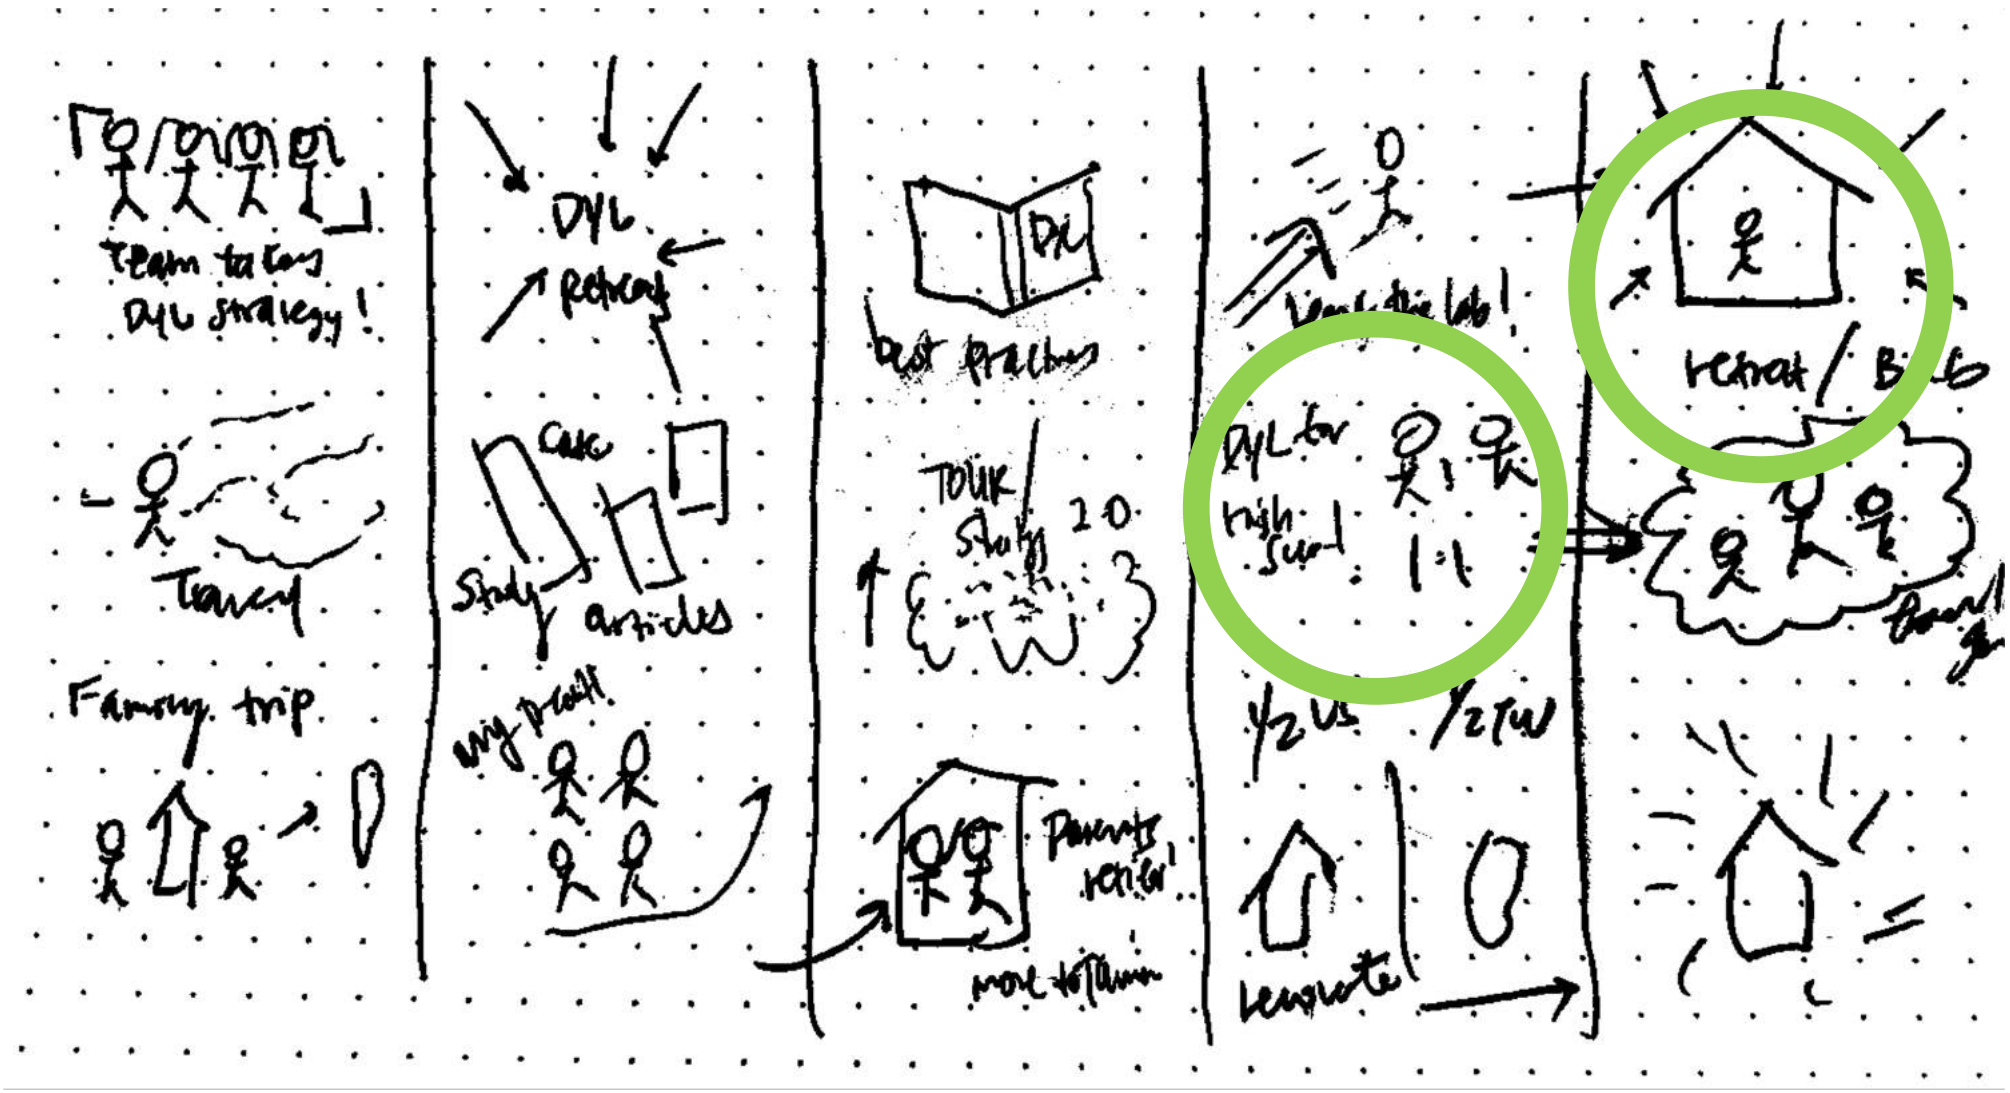

Circle 1-2 parts of your Odysseys that you are curious about and want to explore further.

Where might you need more information, to determine if you want to invest additional resources?

d.life
life design lab

SO - WHAT DO YOU WANT TO PROTOTYPE?

d.life
life design lab

BRAINSTORMING

1. **FRAME** a good problem <u>for ideation</u>

Frame your question:

HOW MIGHT I PROTOTYPE:

(experience from my Odyssey that I'm curious about)

Here are some tips...

FRAMING PITFALLS

Don't prototype *DECIDING* – prototype the thing you want more info about in order to decide.

How might I prototype deciding to do a sabbatical?

How might I prototype *being* on sabbatical?

Don't mix 3-4 questions into 1.

How might I prototype taking a job at a small liberal arts college while raising 2 kids as a single parent and owning a house?

- How might I prototype working at a small liberal arts college? OR
- How might I prototype single parenting away from my family? OR
- How might I prototype home ownership?

Don't ask should or either / or questions! Pick one thing to prototype!

Should I take a job in tech? or in academia?

How might I prototype working in tech?

d.life

life design lab

BRAINSTORMING

1. **FRAME** a good problem <u>for brainstorming</u>

Frame your question:

HOW MIGHT I PROTOTYPE:

(experience from my Odyssey that I'm curious about)

BRAINSTORMING

In a moment, we'll give each other lots of ideas for prototypes.

EXAMPLE

How might I prototype running a bed and breakfast?

BRAINSTORMING

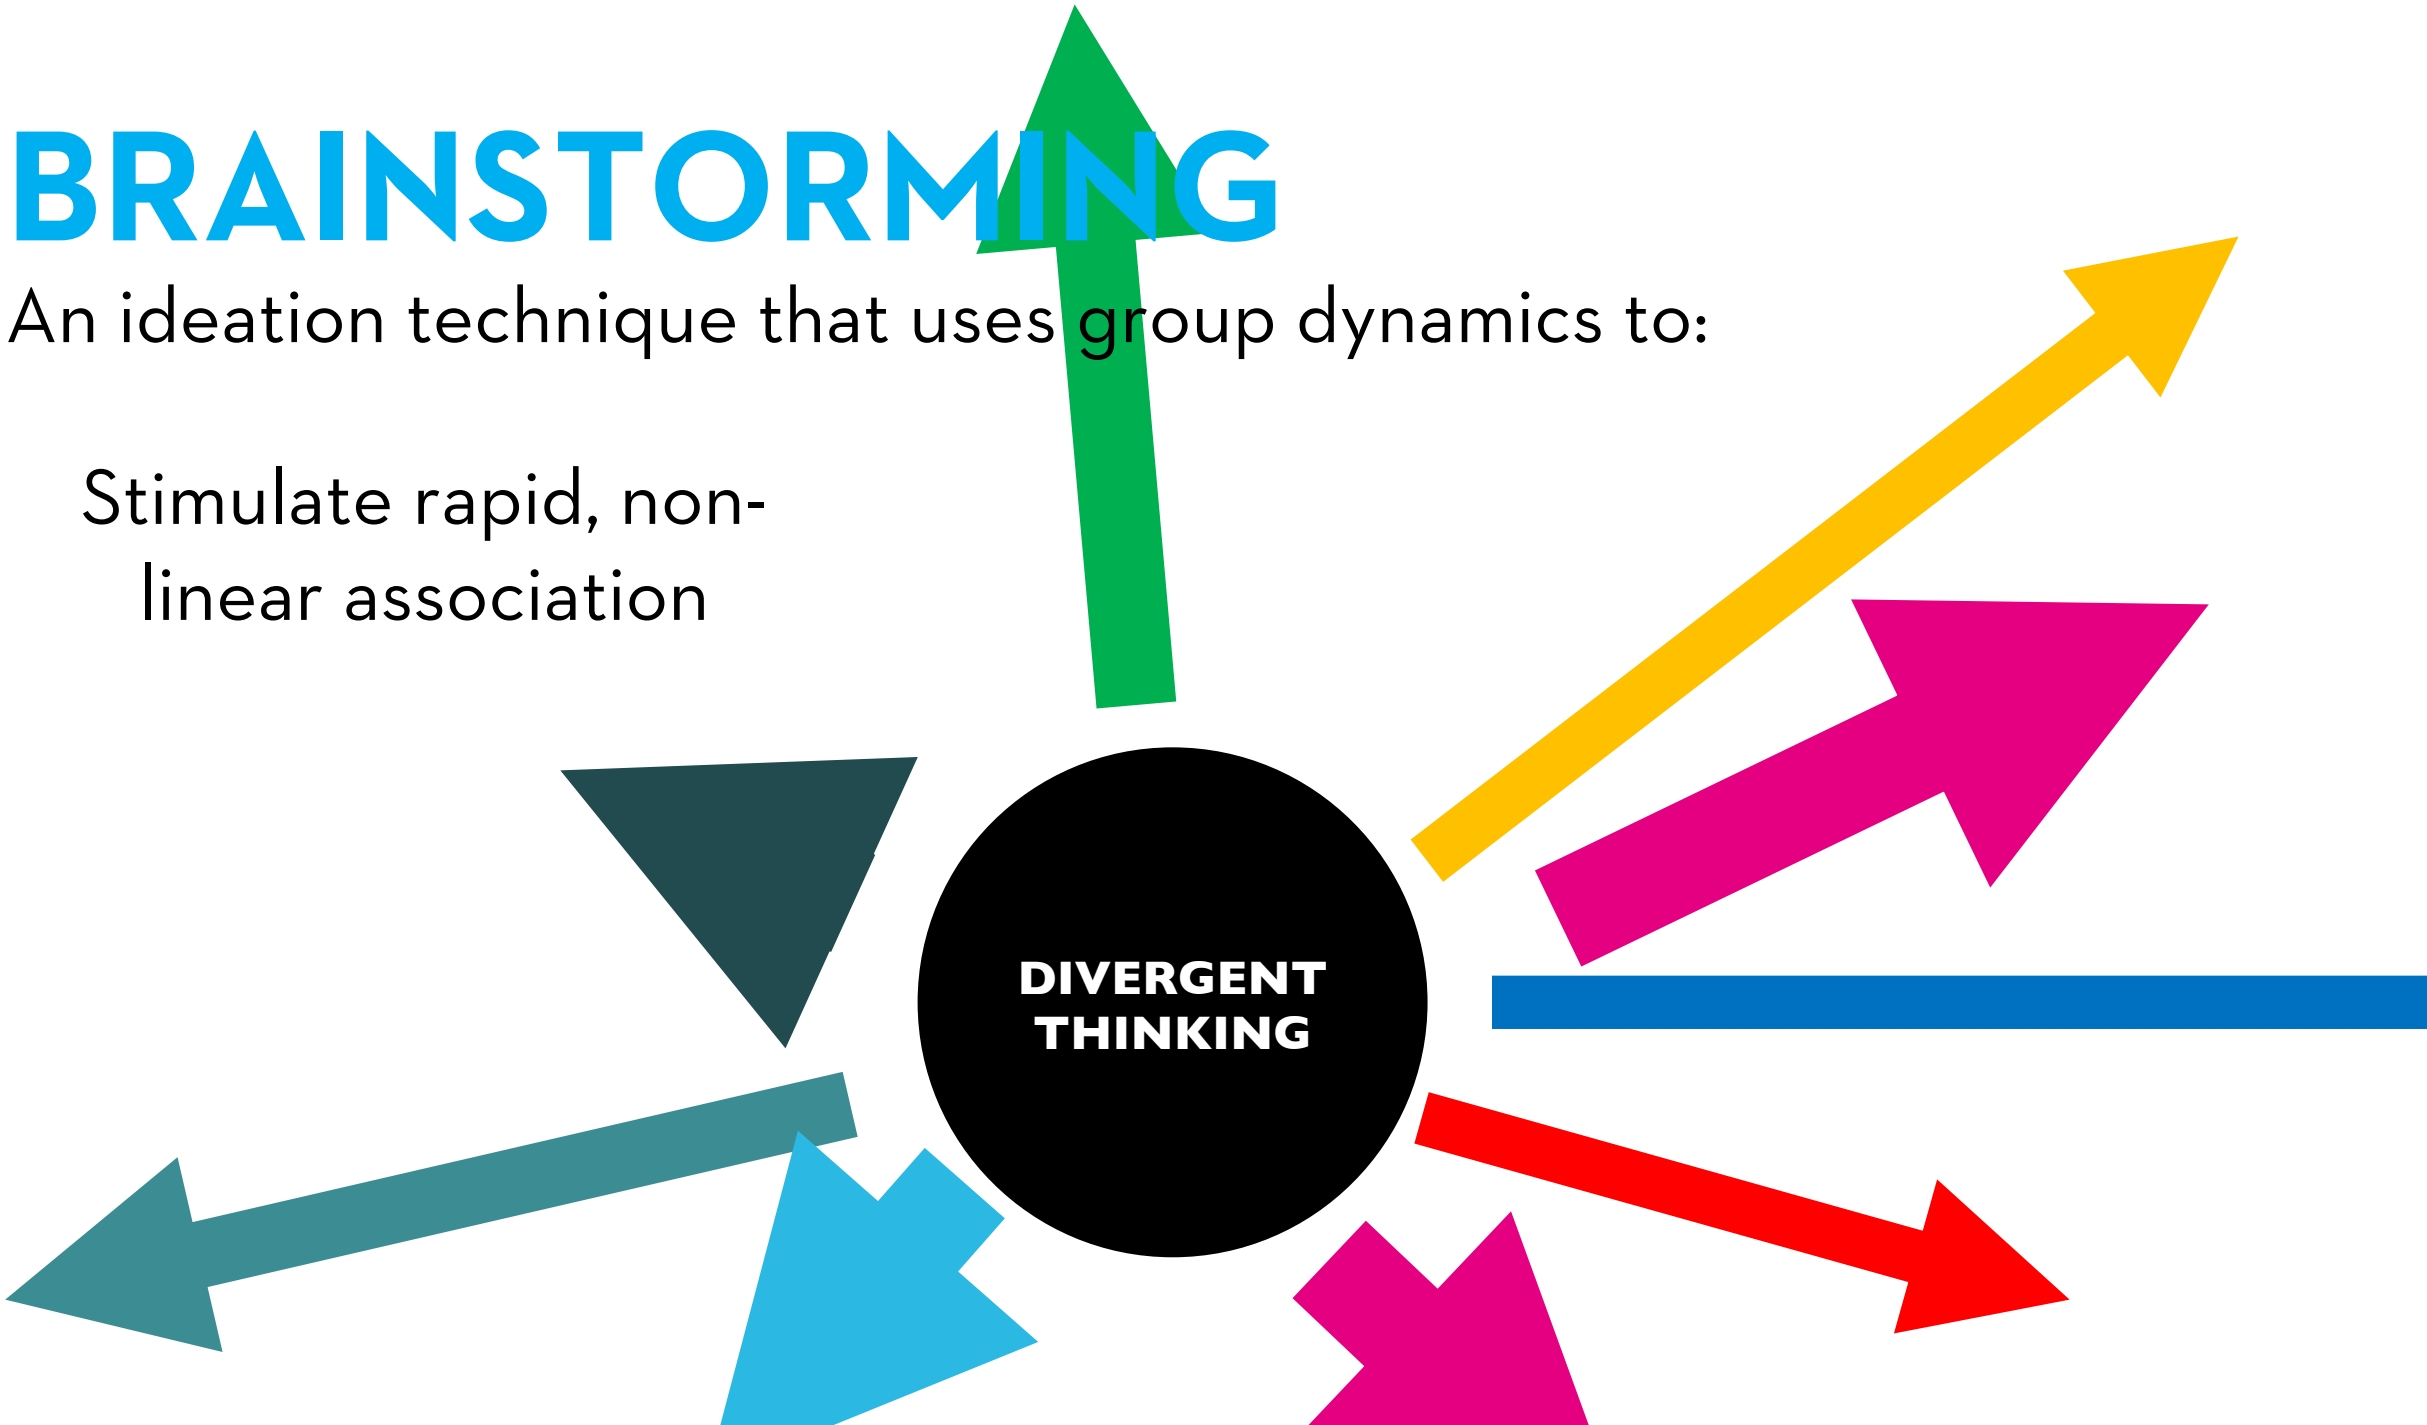

An ideation technique that uses group dynamics to:

Stimulate rapid, non-linear association

BRAINSTORMING

An ideation technique that uses group dynamics to:

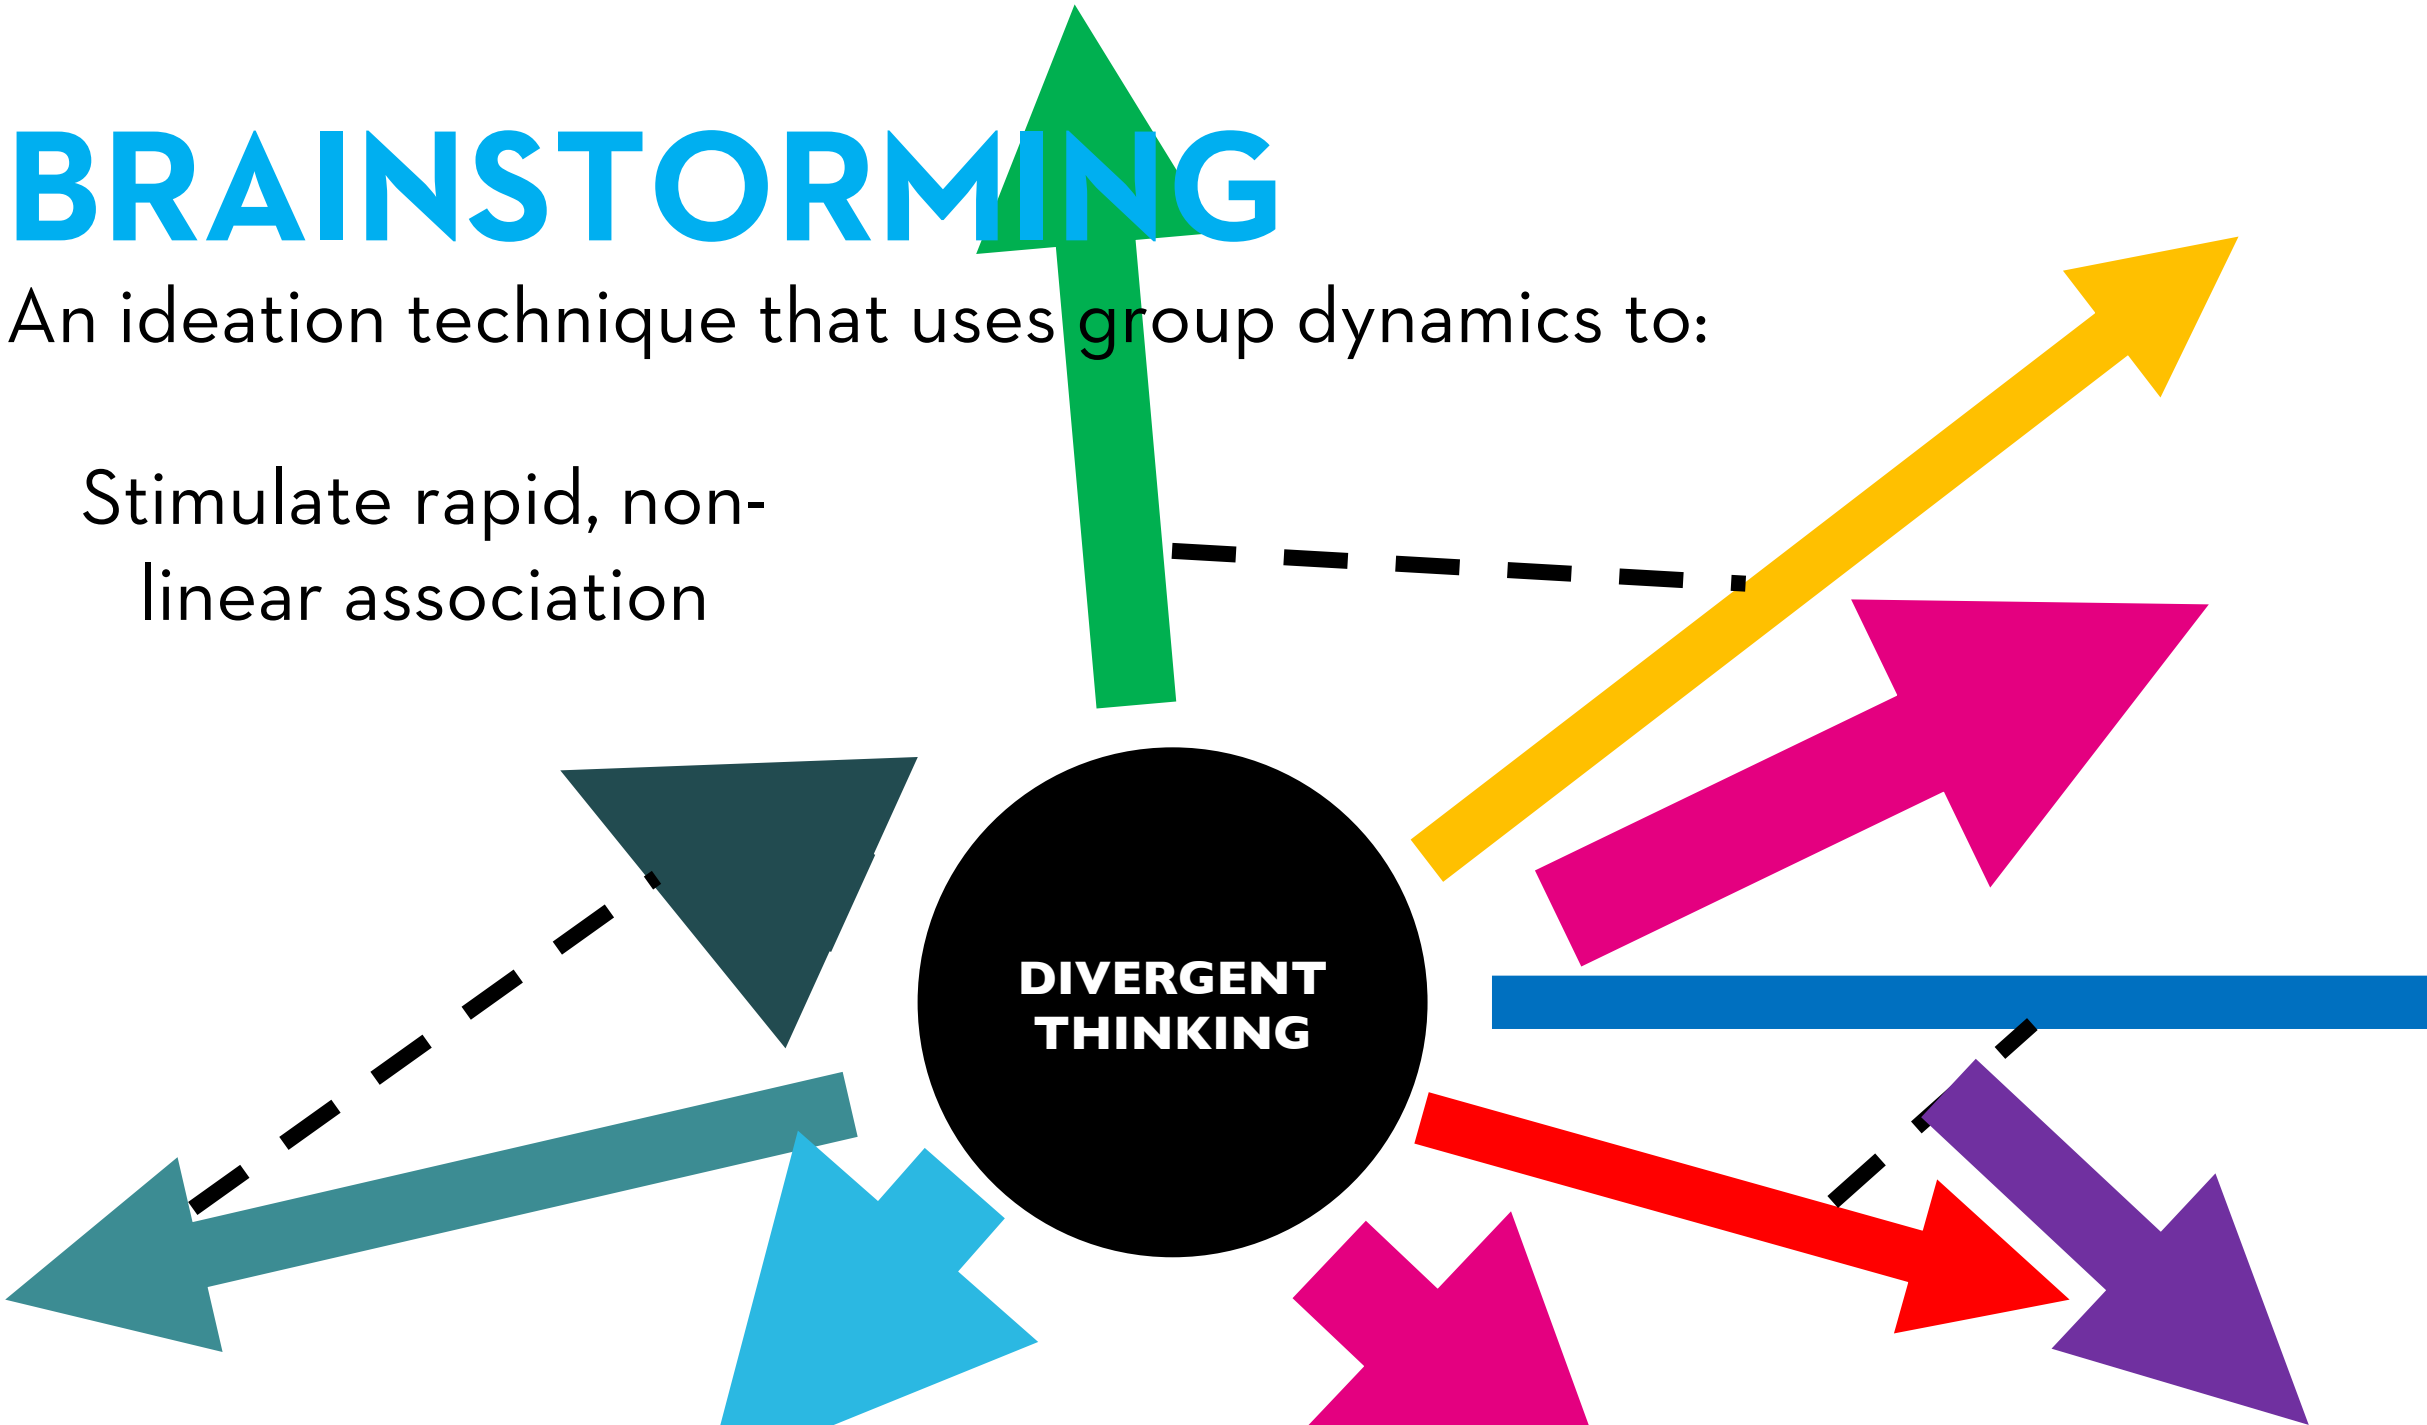

Stimulate rapid, non-linear association

BRAINSTORMING

An ideation technique that uses group dynamics to:

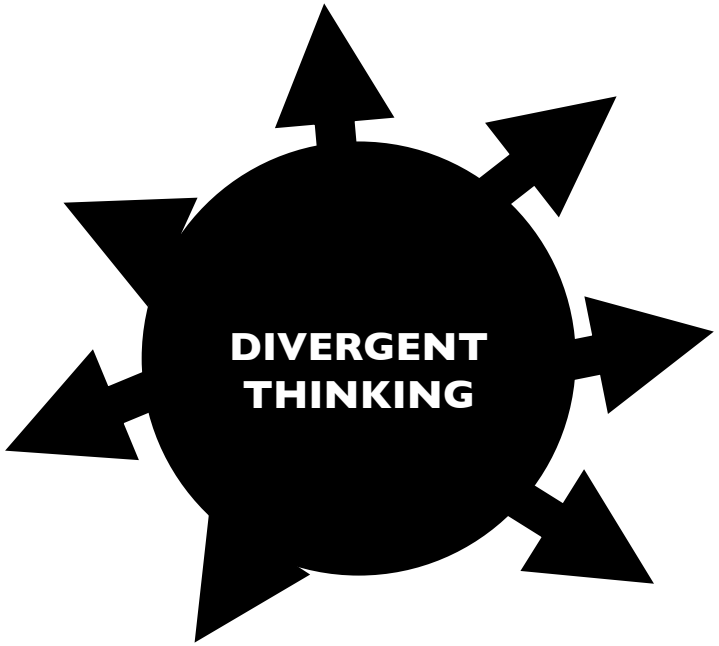

Stimulate rapid, non-linear association

BRAINSTORMING

An ideation technique that uses group dynamics to:

Stimulate rapid, non-linear association

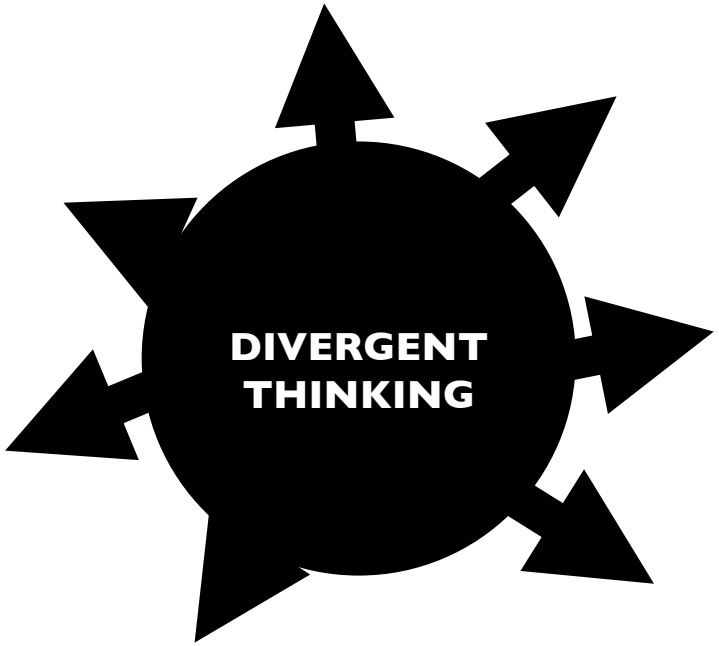

Access the unconscious, problem-solving part of each individual brain and the collective cognition.

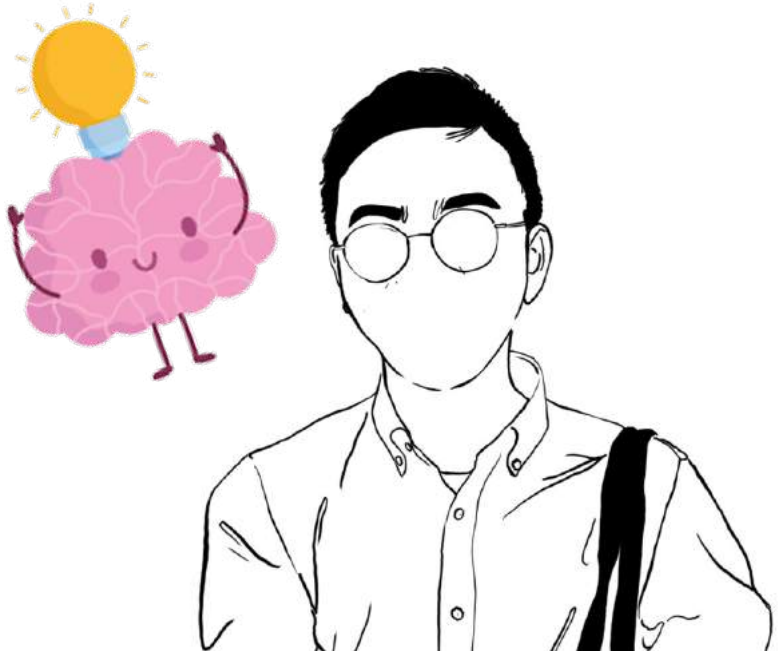

BRAINSTORMING

An ideation technique that uses group dynamics to:

Stimulate rapid, non-linear association

Access the unconscious, problem-solving part of each individual brain and the collective cognition.

BRAINSTORMING

An ideation technique that uses group dynamics to:

Stimulate rapid, non-linear association

Access the unconscious, problem-solving part of each individual brain and the collective cognition.

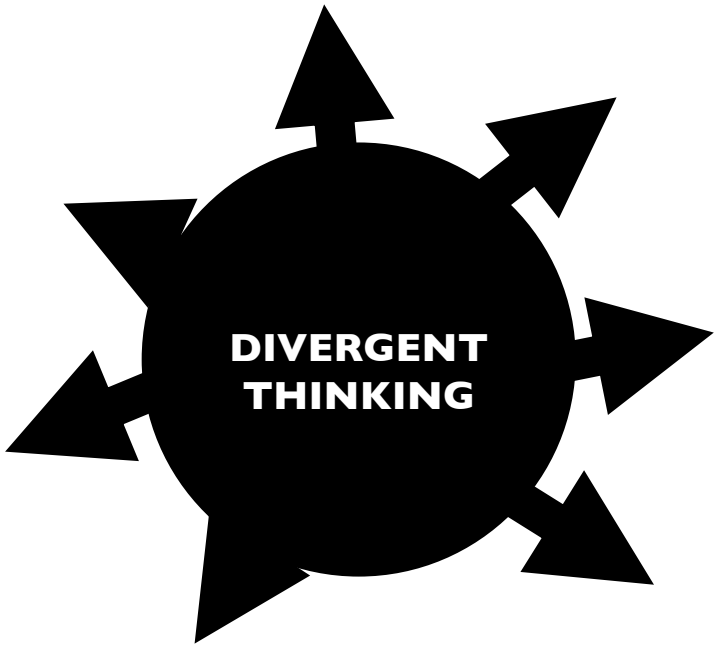

BRAINSTORMING

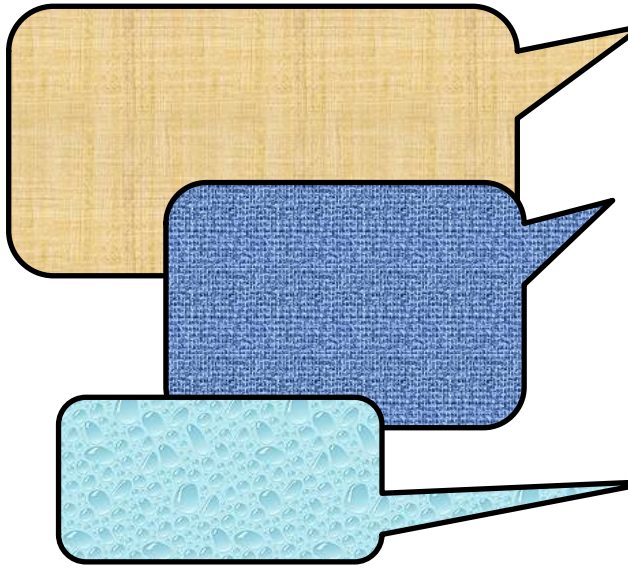

An ideation technique that uses group dynamics to:

Stimulate rapid, non-linear association

Access the unconscious, problem-solving part of each individual brain and the collective cognition.

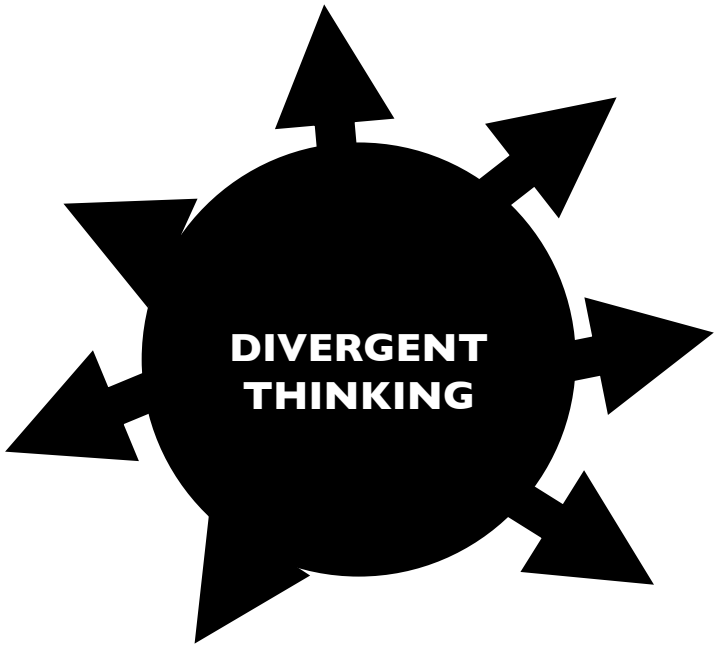

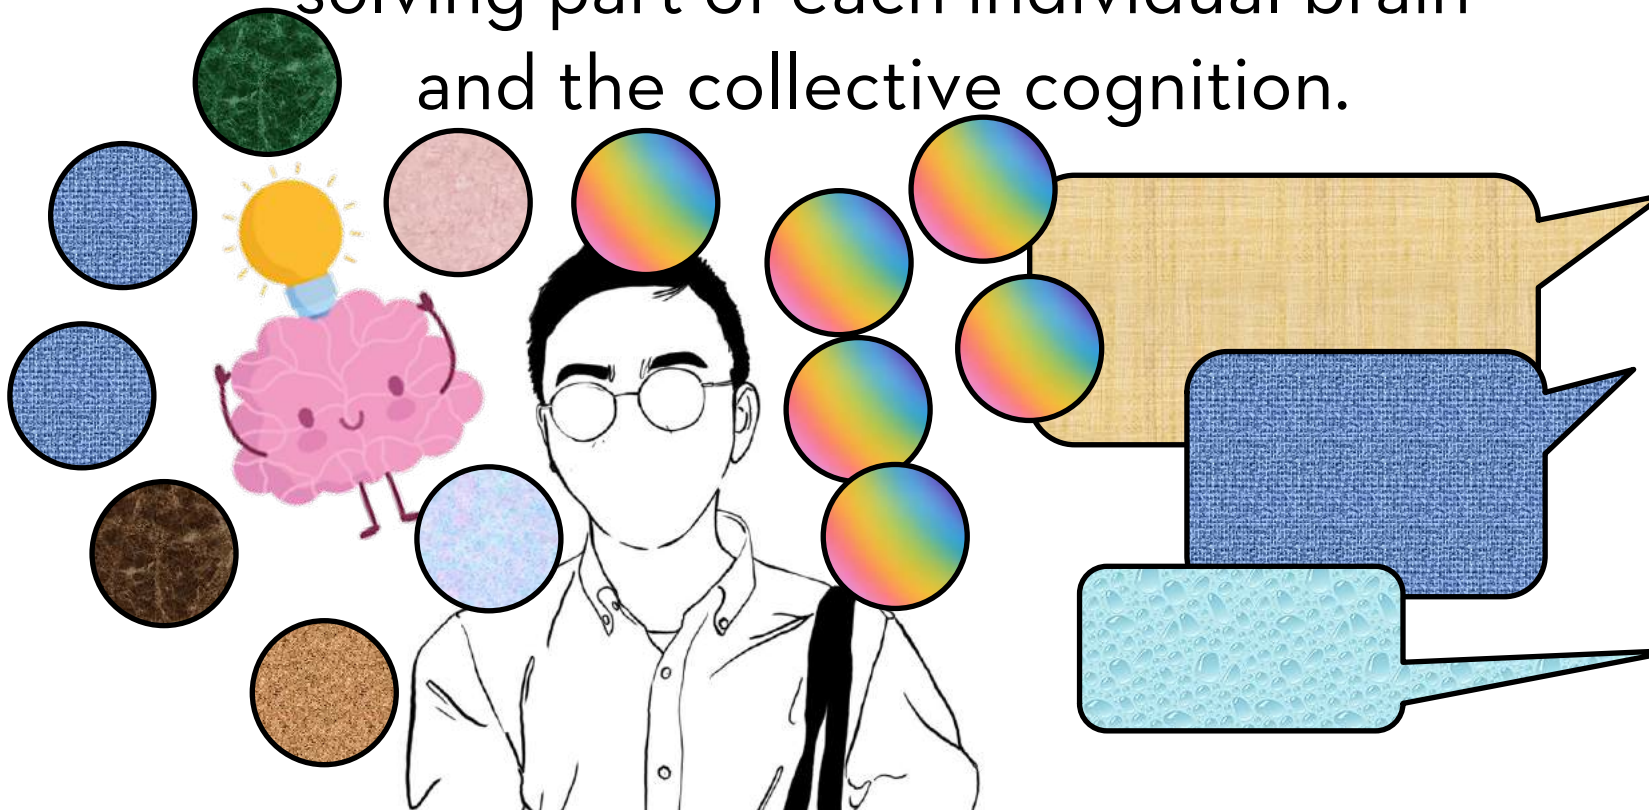

BRAINSTORMING

An ideation technique that uses group dynamics to:

Stimulate rapid, non-linear association

Access the unconscious, problem-solving part of each individual brain and the collective cognition.

5 STEPS OF BRAINSTORMING

1. FRAME a good problem

2. WARM UP to access the synthesizing brain

3. Use specific rules to BRAINSTORM lots and lots of ideas

4. SELECT ideas based on a specific criterion

5. EXTRACT INSIGHTS for follow-up

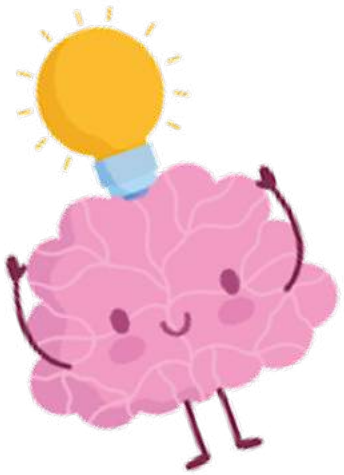

4 RULES OF BRAINSTORMING

BRAINSTORMING LOTS OF IDEAS

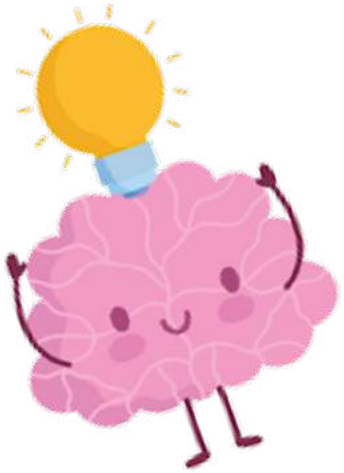

Rules:

Defer judgment.

4 RULES OF BRAINSTORMING

BRAINSTORMING LOTS OF IDEAS

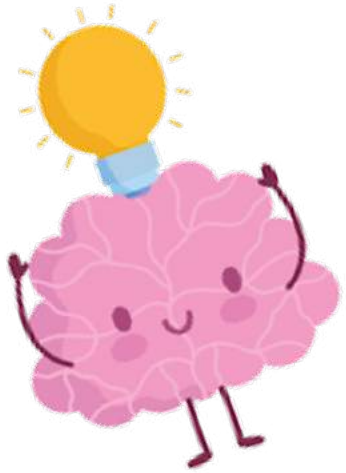

Rules:

Defer judgment.

Go for volume.

4 RULES OF BRAINSTORMING

BRAINSTORMING LOTS OF IDEAS

Rules:

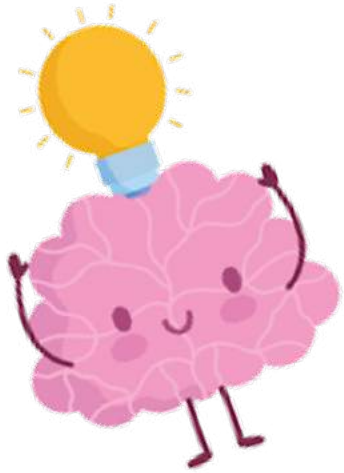

Defer judgment.

Go for volume.

Build on the ideas of others.

4 RULES OF BRAINSTORMING

BRAINSTORMING LOTS OF IDEAS

Rules:

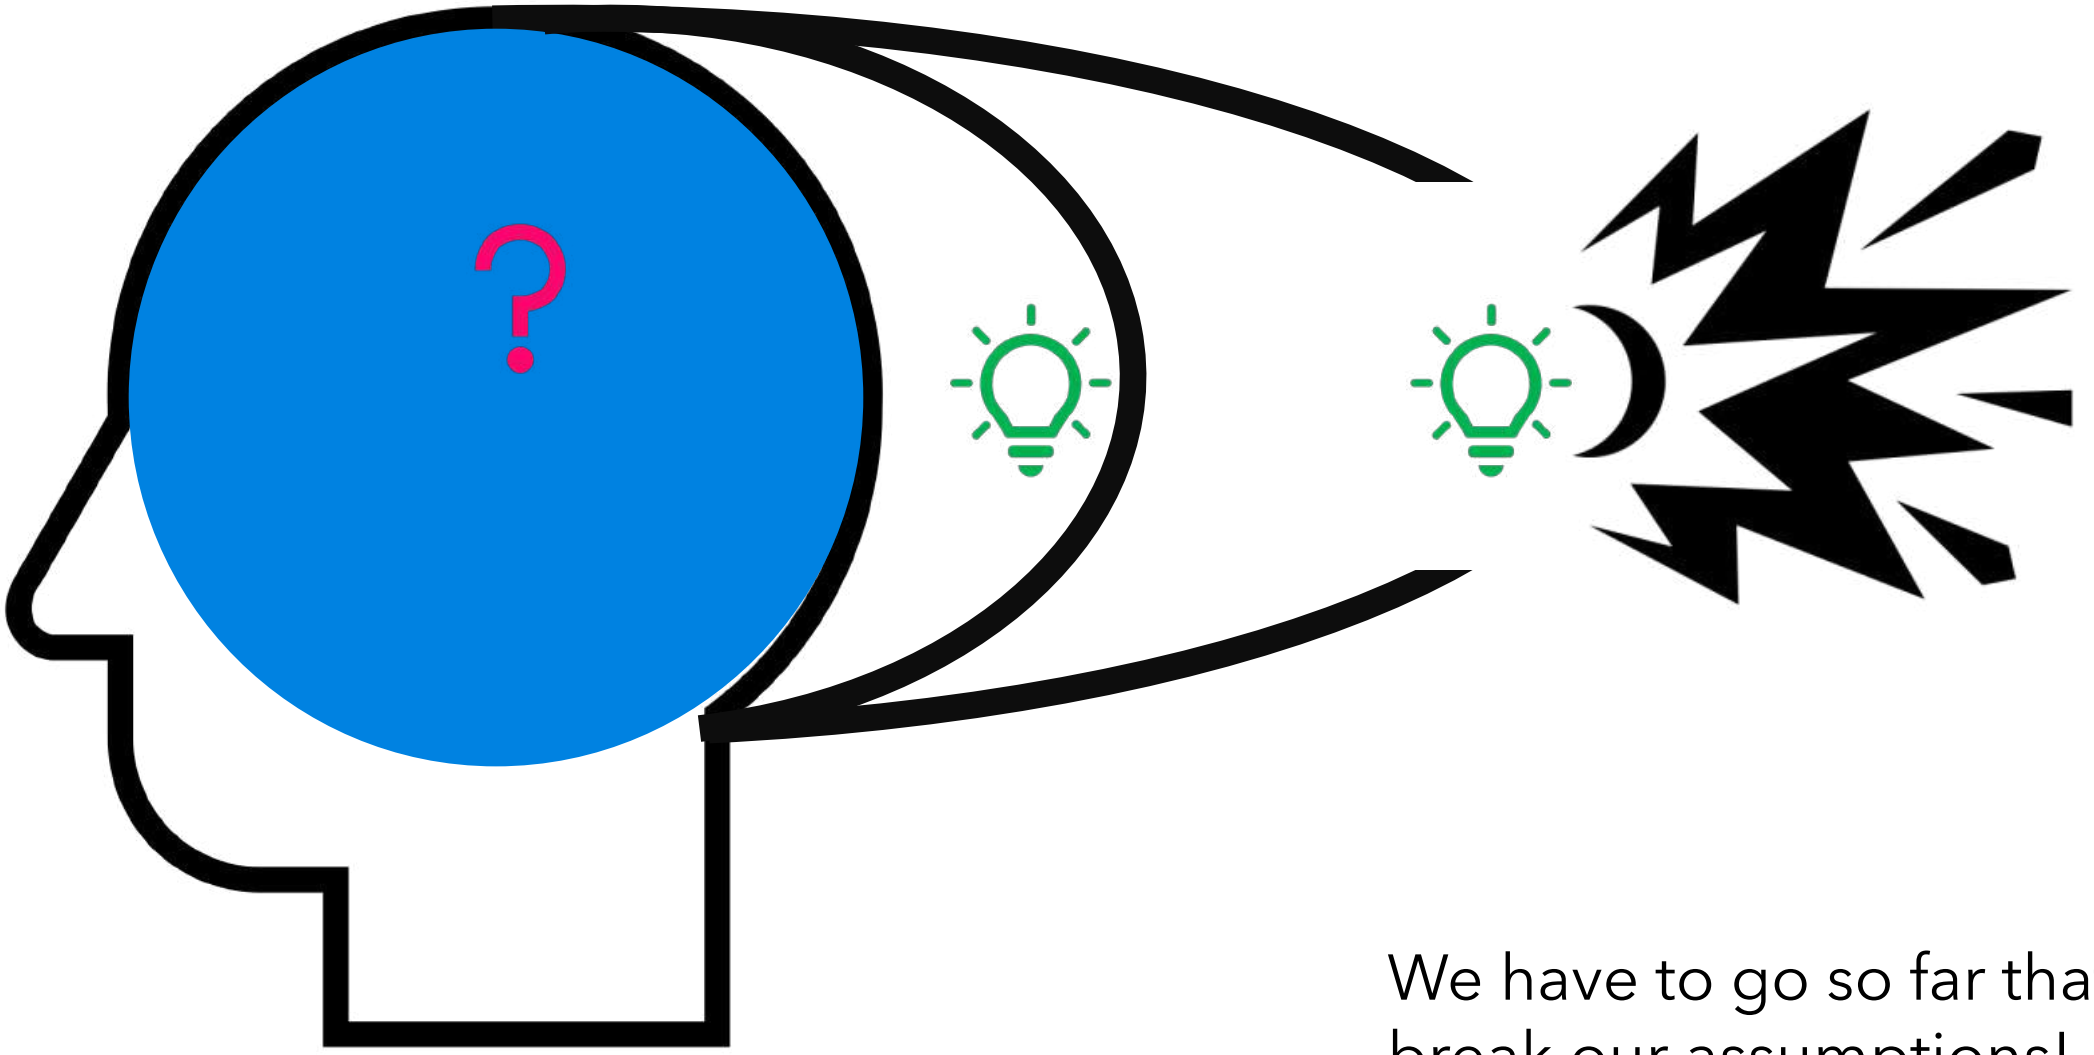

Defer judgment.

Go for volume.

Build on the ideas of others.

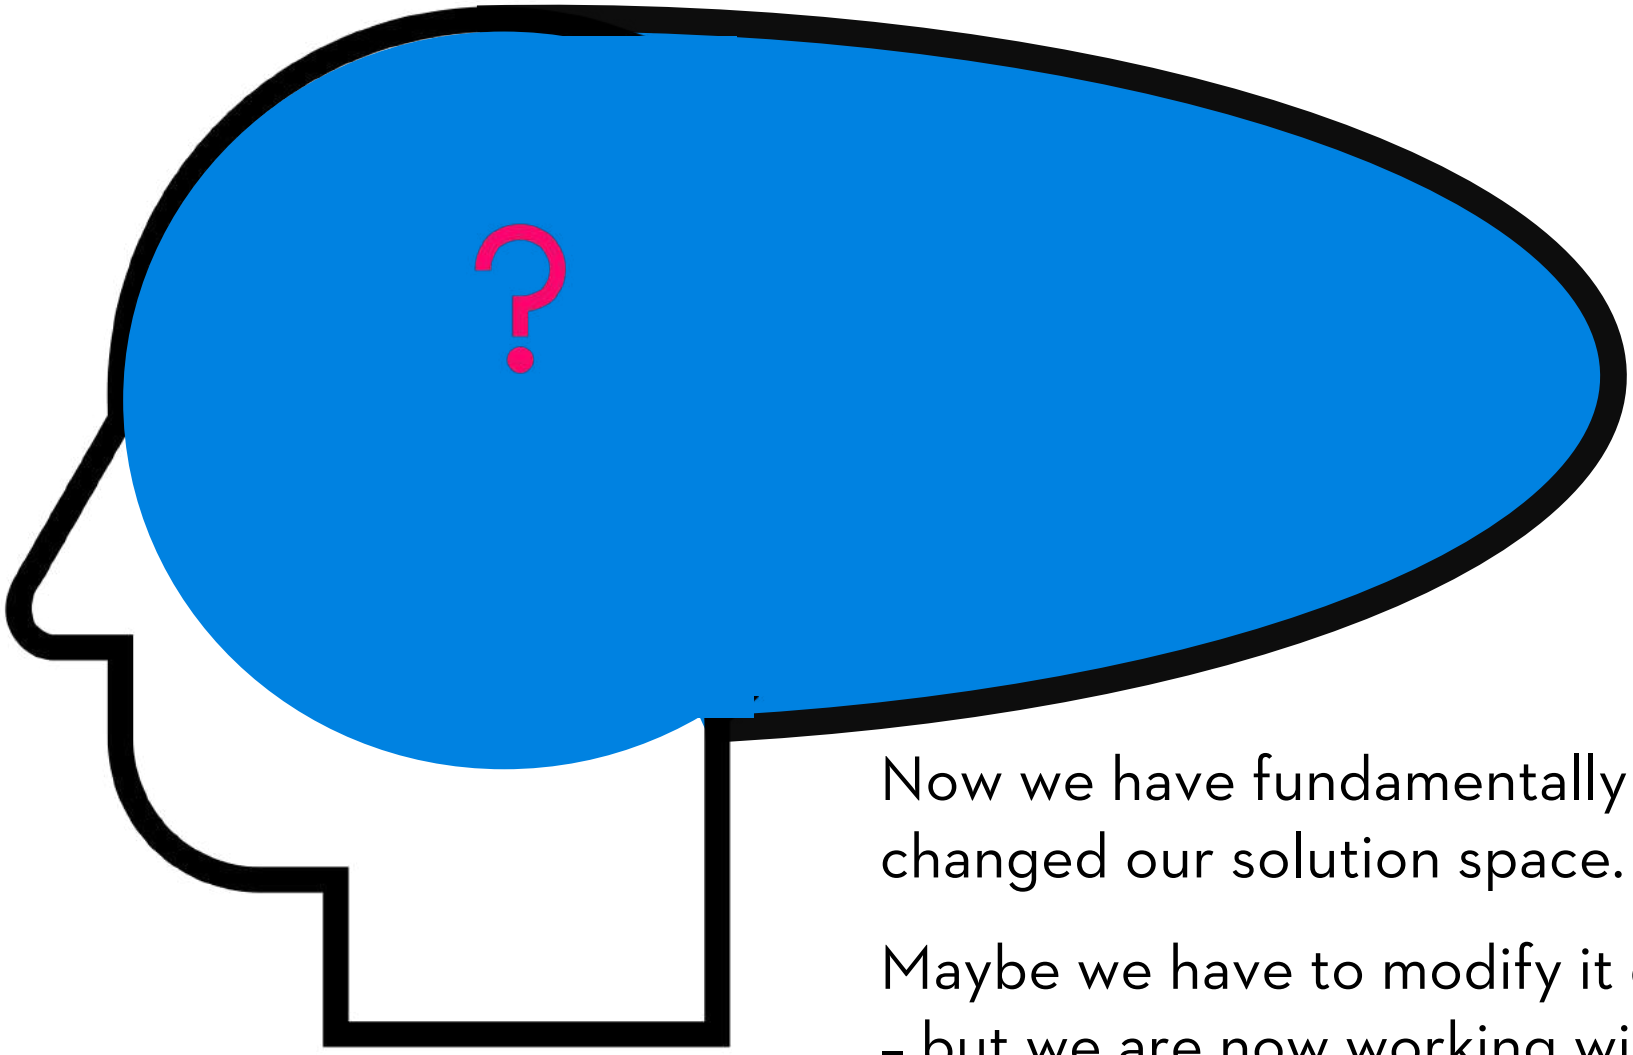

Encourage wild ideas.

WHY WILD IDEAS?

We have to go so far that we break our assumptions!

WHY WILD IDEAS?

Now we have fundamentally changed our solution space.

Maybe we have to modify it during implementation – but we are now working with new insights!

LET'S DO IT!

IDEATION

✓ **FRAME** a good problem

2. **WARM UP**

3. **BRAINSTORM** lots of ideas

4. **SELECT** ideas based on a specific criterion

5. **EXTRACT INSIGHTS** for follow-up.

In a moment, we will BRAINSTORM in MIRO

In a **brainstorming group**, we will VERBALLY come up with ideas for prototype conversations and experiences for each other to start making our Odysseys real.

EXAMPLE:

How might I prototype running a bed and breakfast?

DEMO

d.life
life design lab

WARM UP

DEMO

FIND MIRO AND WARM UP

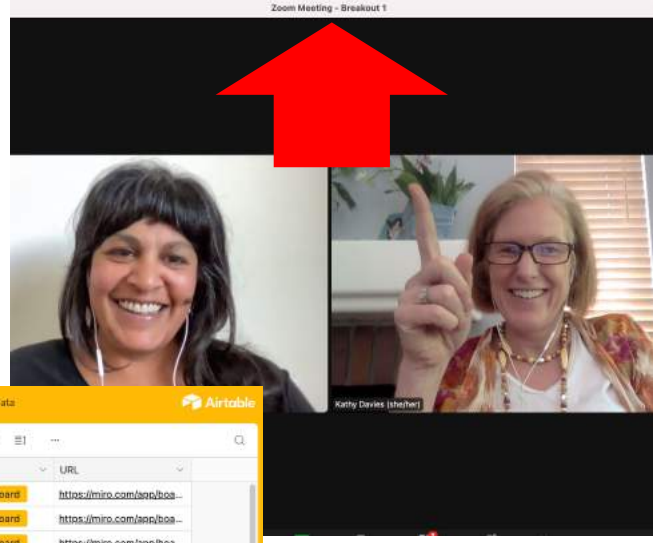

We will go to breakouts in 3s.

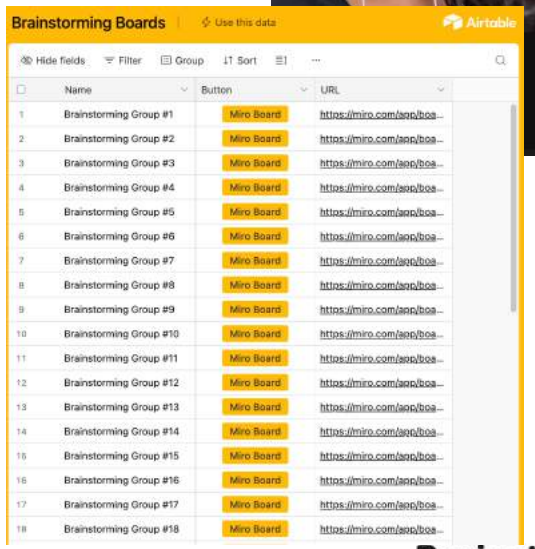

Notice your breakout room number and go to the MIRO board **together.**

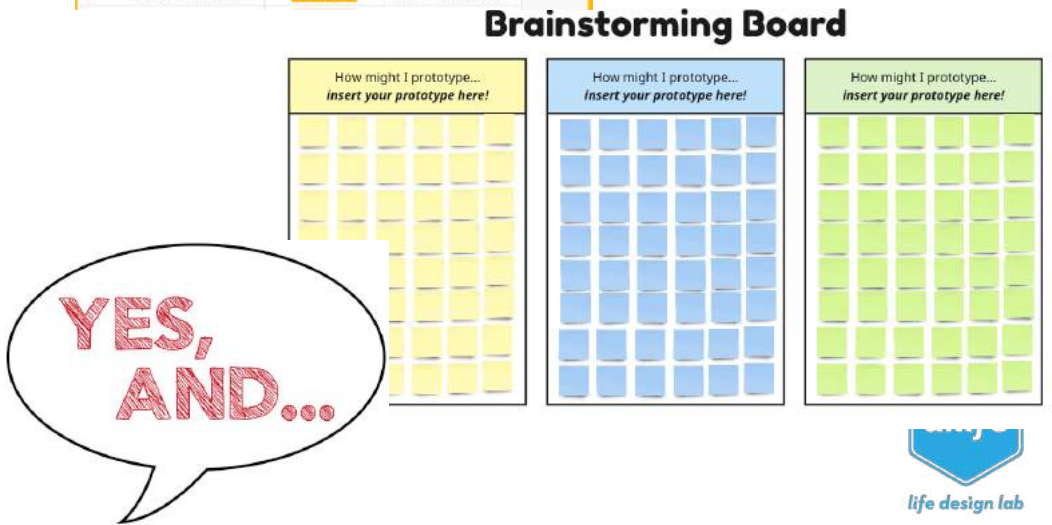

Find the board that has your breakout group number on it.

Everyone will put up their prototype questions and then we will warm up:

Play “YES and!” - designing a graduation party!

BRAINSTORMING

✓ **FRAME** a good problem

✓ **WARM UP**

3. **BRAINSTORM** lots of ideas

4. **SELECT** ideas based on a specific criterion

5. **EXTRACT INSIGHTS** for follow-up.

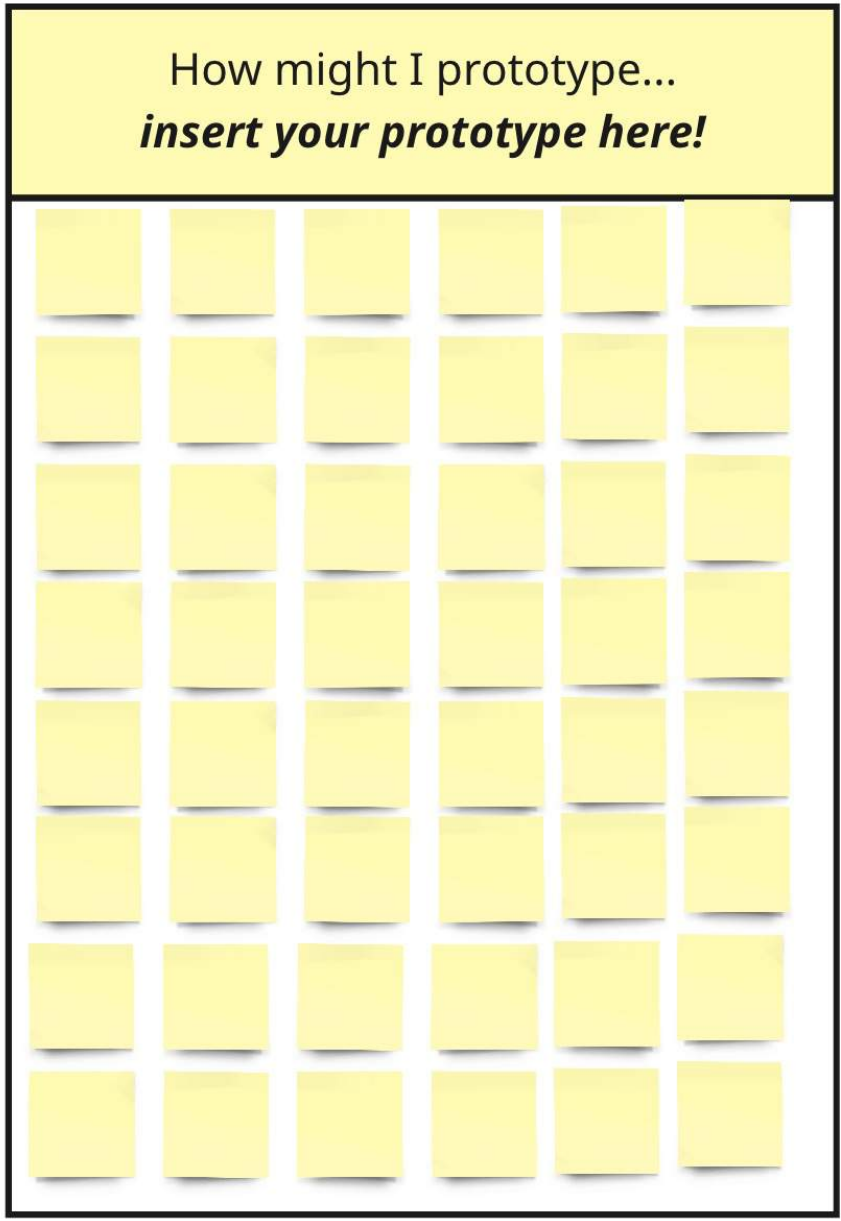

VERBAL BRAINSTORMING!

We'll now send you into breakouts.

Have the person most comfortable with MIRO act as scribe, and share screen.

BRAINSTORM FOR **PERSON 1!**

Defer judgment
Go for volume
Encourage wild ideas
Build on the ideas of others!

VERBAL BRAINSTORMING!

How many ideas did you get?

What was working?

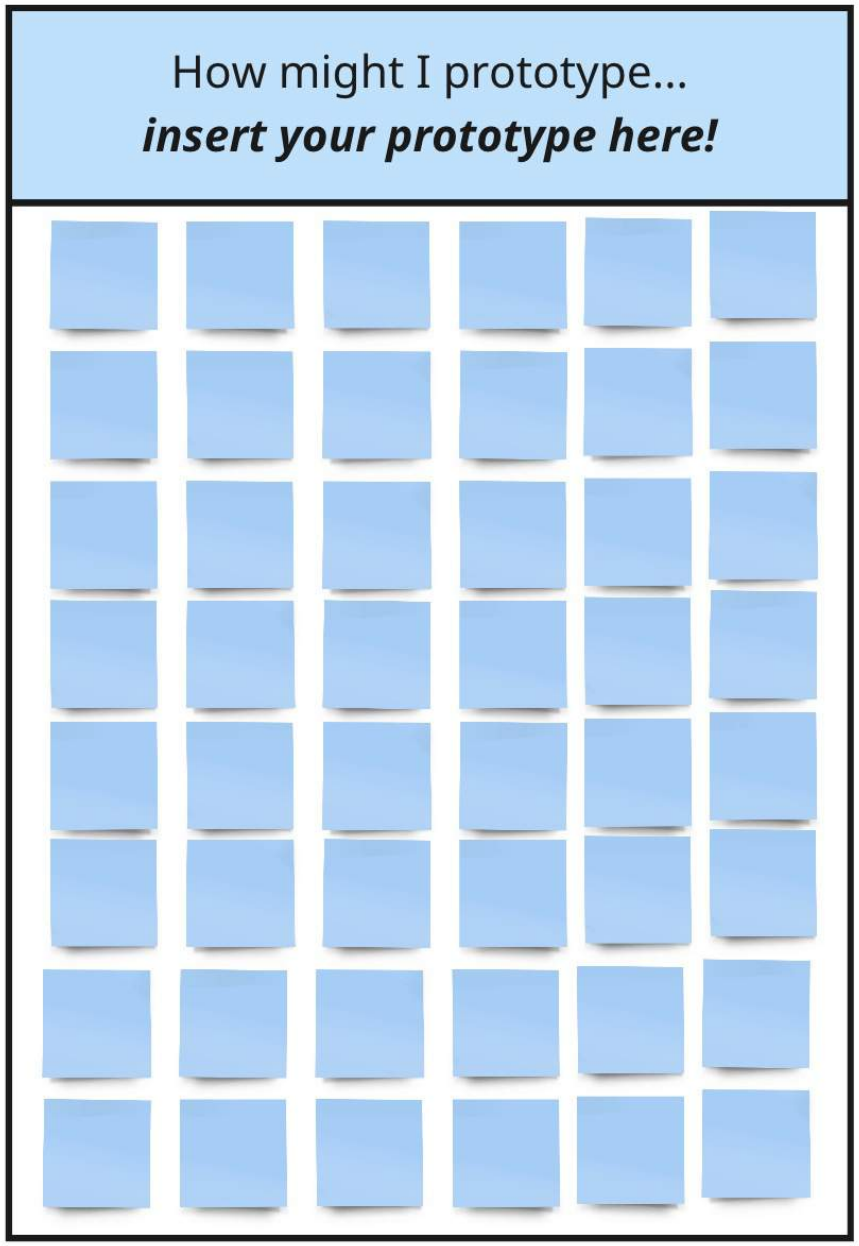

BRAINSTORM FOR **PERSON 2!**

Defer judgment

Go for volume

Encourage wild ideas

Build on the ideas of others!

VERBAL BRAINSTORMING!

How many ideas did you get?

What was working?

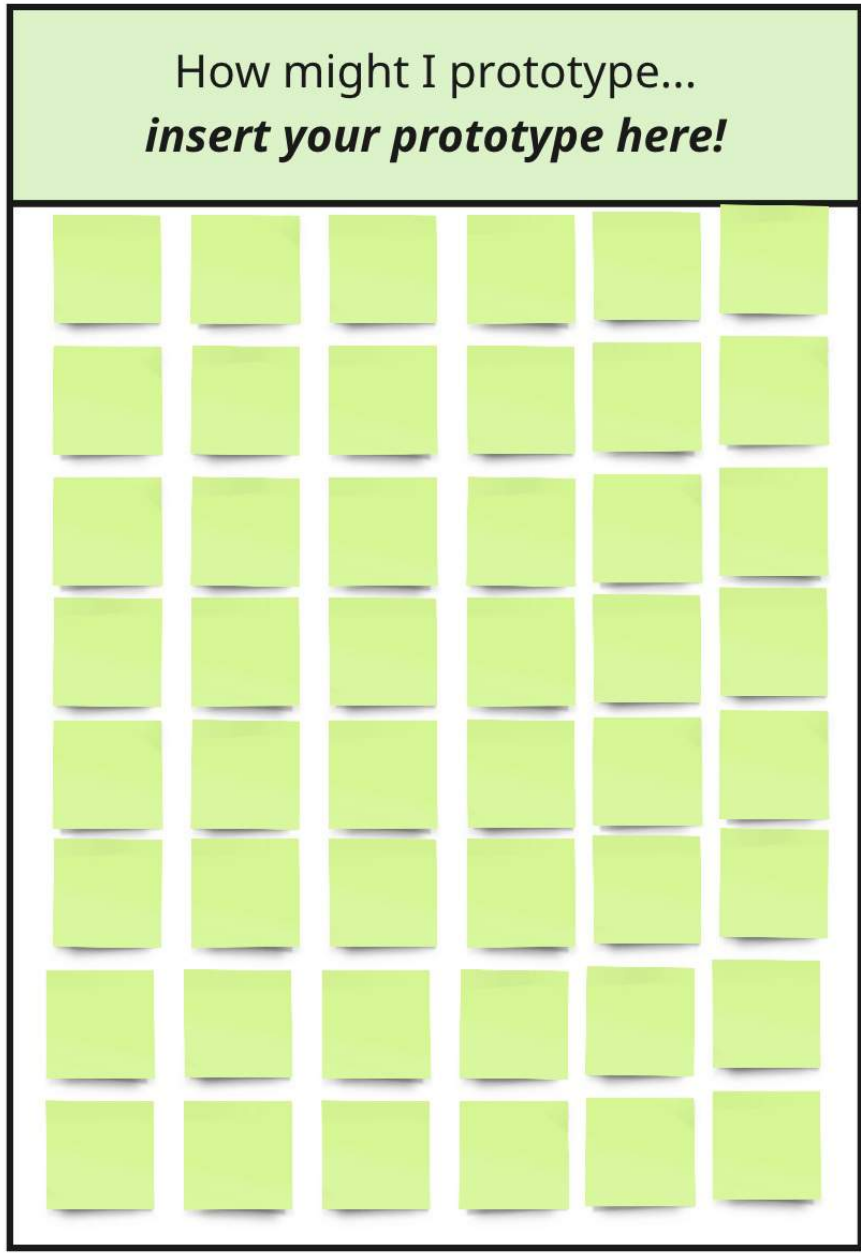

BRAINSTORM FOR **PERSON 3!**

Defer judgment

Go for volume

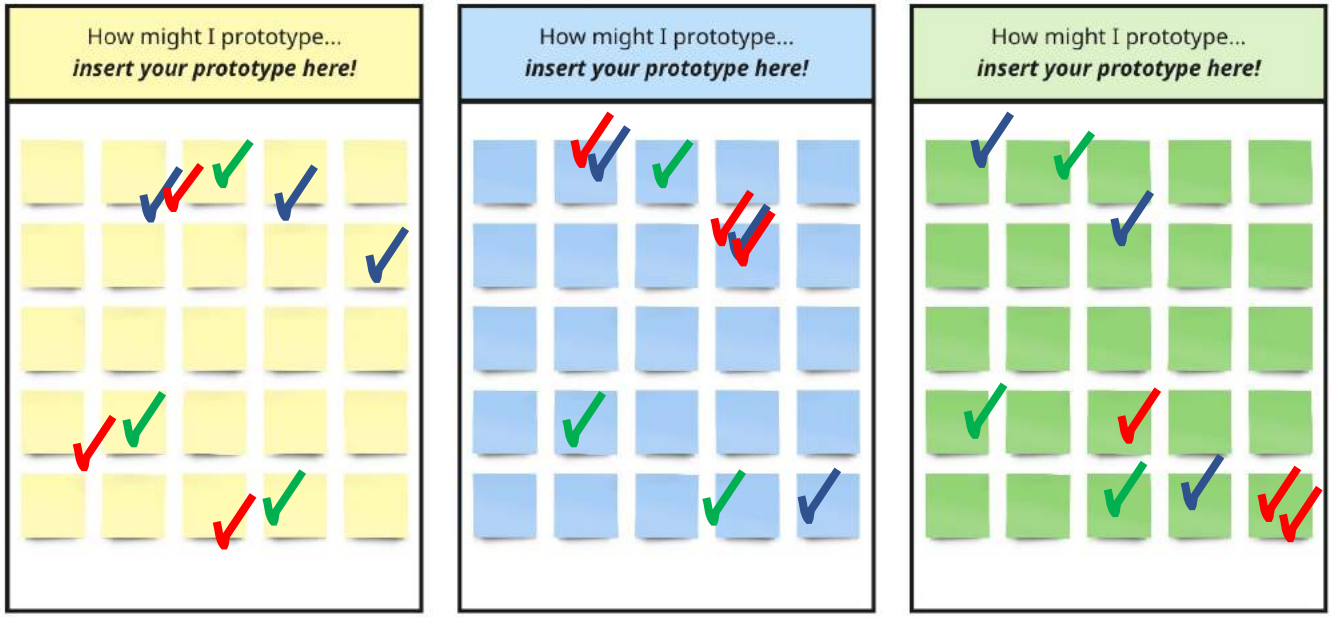

Encourage wild ideas

Build on the ideas of others!

STEP 4 – CHOOSE

- Everyone reviews the boards in their group of 3.
- Each person votes three times on each board, including their own, using the criterion, "Most opportunity to learn." (9 votes total).
- Don't worry yet if they are doable!

d.life
life design lab

STEP 5: EXTRACTING INSIGHTS

The ideas of brainstorming are like...

an egg in an egg hunt...

you have to crack it open to find the insights.

d.life
life design lab

EXTRACTING INSIGHTS

- The ideas selected may not be practical or executable.

- Ask yourself: What is this idea really about?

- Put another way:

WHY/HOW would I learn from this idea?

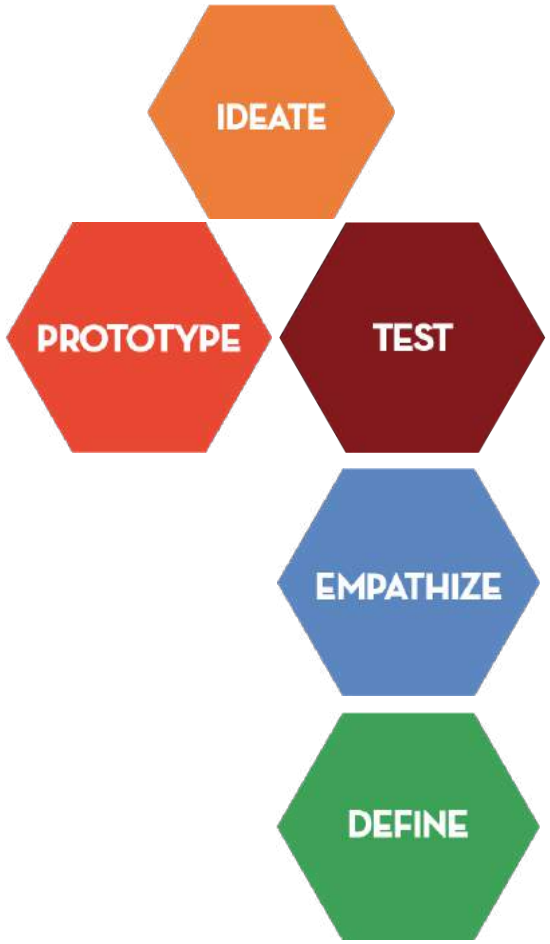

d.life
life design lab

STEP 5: EXTRACT INSIGHTS FOR ACTION

1. Return to your own chart.
2. Look over the ideas that have been selected.
3. Using these ideas as inspiration, choose or invent a final specific and actionable prototype that you could do in the next 2 weeks for less than $20.
4. Write it down!

EXTRACTING INSIGHTS

Next steps can vary depending on your insights

- Brainstorm additional, more feasible ideas for a prototype
- Open an area for further research and exploration
- Redefine your problem or reframe your goal

d.life
life design lab

PAIR SHARE

SPEAKERS: Share your idea(s) for prototypes.

LISTENERS: Reflect Back -

- where the other person seems most excited, and,
- what you think the person might learn if they actually did each of the prototypes.

(3 min each)

RADICAL COLLABORATION

BIAS TOWARD ACTION

d.life
life design lab

PROTOTYPE DESIGN

Chat in:

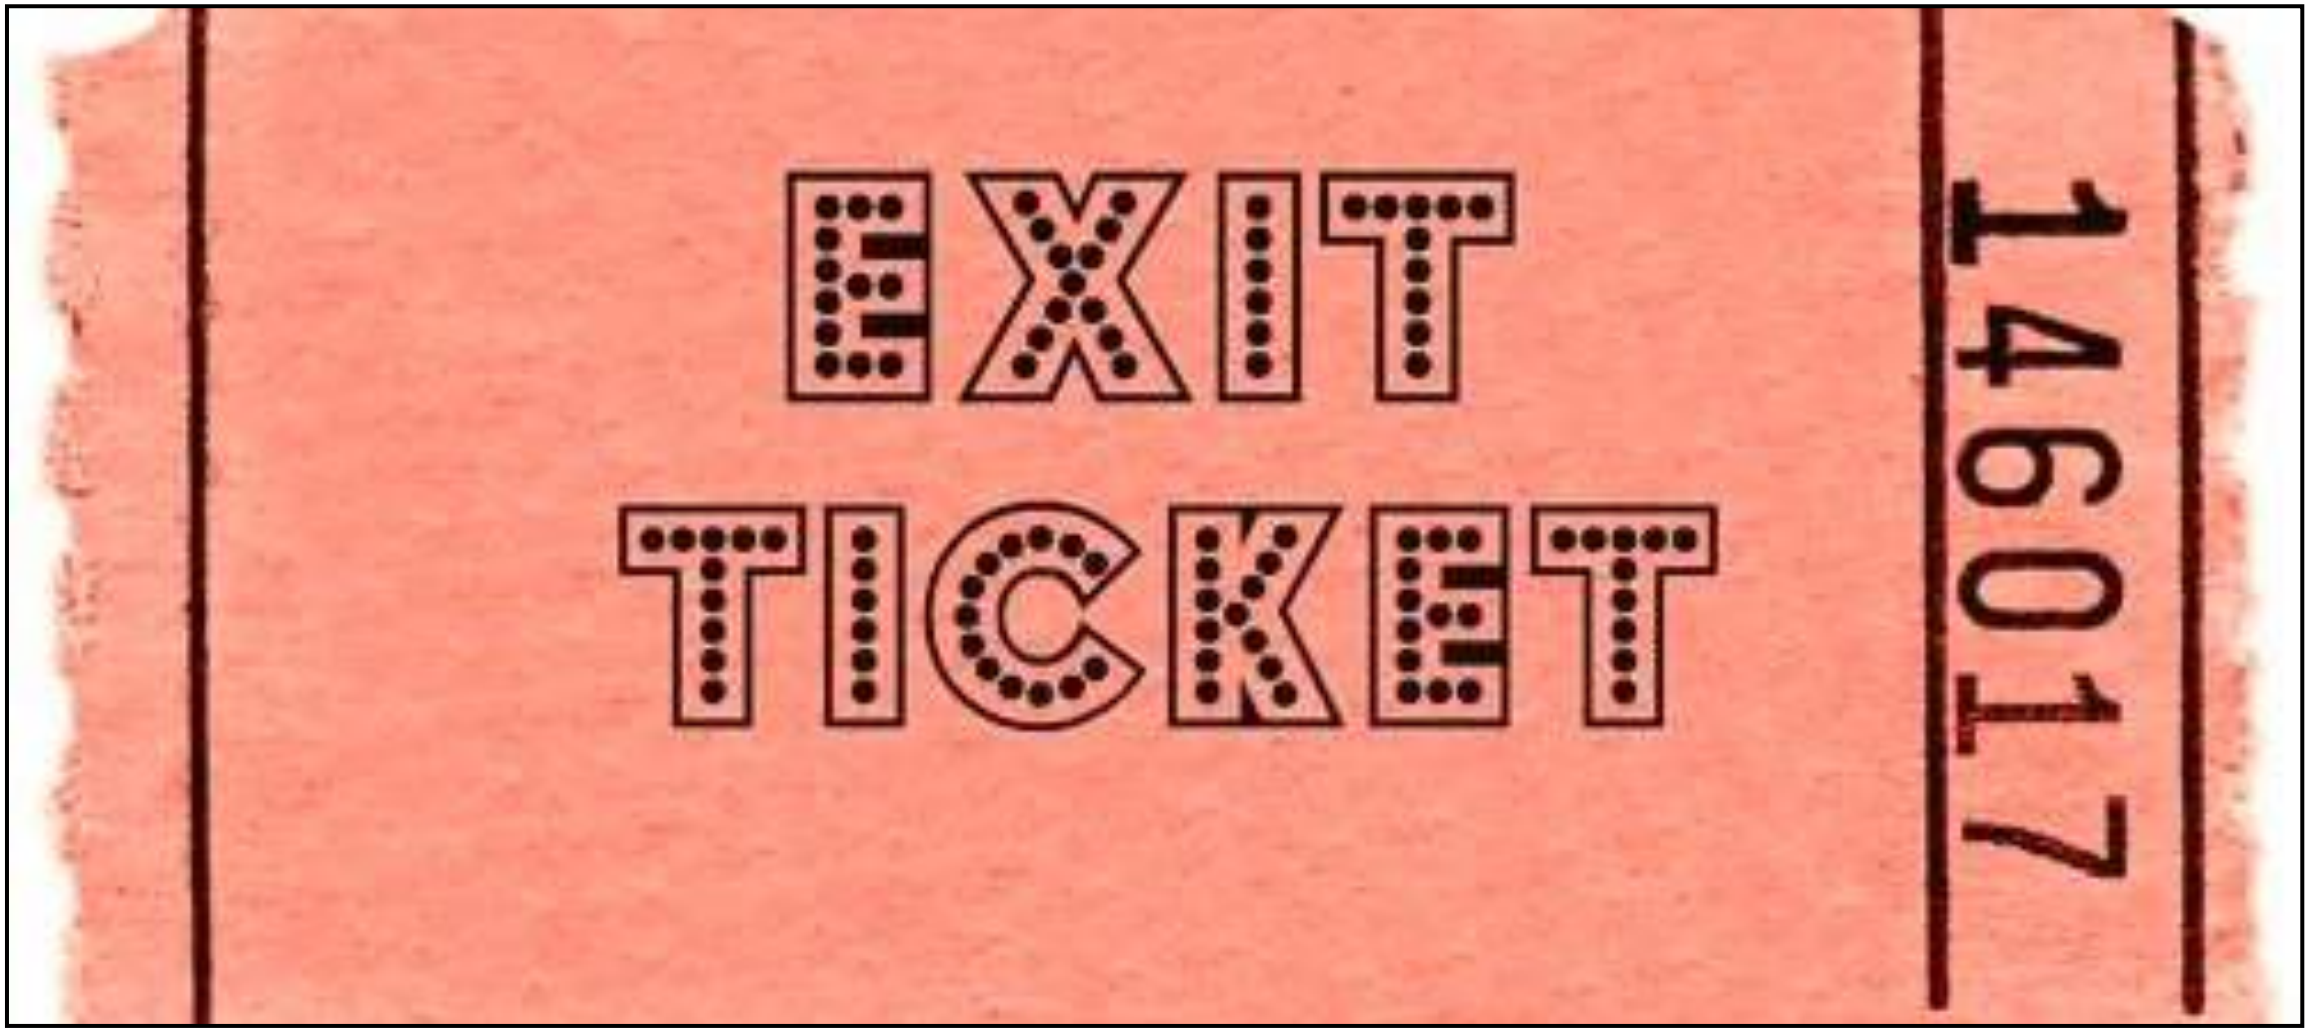

- What will you prototype?

TAKEAWAYS

- Prototype everything!
- Great way to sneak up on your potential future and test it.
- Helps you make data-driven decisions.
- If you actually DO the prototypes you just came up with, you'll learn a ton.
